## प्रस्तावना

राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (एनएसएसओ) 1950 में अपने स्थापना के बाद नियमित रूप से पारिवारिक उपभोग व्यय सर्वेक्षण आयोजित करता रहा है। इन सर्वेक्षणों से एकत्र की गई जानकारी राष्ट्रीय और राज्य स्तरों पर विभिन्न संकेतकों के लिए प्राथमिक खोत है। ये संकेतक योजना बनाने, नीति बनाने, निर्णय लेने और सरकारी संगठनों, शिक्षाविदों, शोधकर्ताओं और विद्वानों द्वारा आगे के सांख्यिकीय विश्लेषण के लिए आवश्यक हैं। सबसे नवीनतम सर्वेक्षण अगस्त 2022 से जुलाई 2023 तक किया गया।

गैर-नमूनाकारण त्रुटियों को कम करने एवं प्रत्यर्थीयों की सहजता को ध्यान में रखते हुए पारिवारिक उपभोग व्यय सर्वेक्षण (एचसीईएस: 2022-23) की तीन अलग-अलग पृष्ठावलियों की जानकारी तीन अलग-अलग माह के दौरान एकत्र की गई। इसके अतिरिक्त, सभी आर्थिक स्तरों पर उचित प्रतिनिधित्व सुनिश्चित करने के लिए परिवारों के चयन के मानदंडों को संशोधित किया गया। पिछले कुछ वर्षों में पारिवारिक उपभोग के प्रतिमान में बदलाव को दर्शाने के लिए उपभोग की जाने वाली वस्तुओं एवं सेवाओं का अद्यतन किया गया।

सर्वेक्षण का क्षेत्र कार्य पूरा होने के छह महीने बाद सर्वेक्षण के प्रमुख निष्कर्षों को तथ्य पत्रक के रूप में फरवरी 2024 में प्रकाशित किया गया। यह प्रकाशन एचसीईएस 2022-23 की विस्तृत रिपोर्ट है, जो राज्य और अखिल भारतीय दोनों स्तरों पर पारिवारिक उपभोक्ता व्यय के विभिन्न पहलुओं के अनुमान प्रदान करती है। रिपोर्ट में राज्य/केंद्र शासित प्रदेश और अखिल भारतीय स्तरों पर मासिक प्रति व्यक्ति उपभोग व्यय (एमपीसीई) के ग्रामीण और शहरी औसत के साथ-साथ प्रत्येक राज्य/केंद्र शासित प्रदेश के लिए उपभोग श्रेणियों द्वारा एमपीसीई का पूर्ण और प्रतिशत विभाजन शामिल है।

एनएसएसओ के सर्वेक्षण अभिकल्प एवं अनुसंधान प्रभाग (एसडीआरडी) ने सर्वेक्षण पद्धति एवं संसाधनों को विकसित किया और इस दस्तावेज को तैयार किया। क्षेत्र कार्य, क्षेत्र संकार्य प्रभाग (एफओडी) द्वारा किए गए, जबकि समंक विधायन प्रभाग (डीपीडी) द्वारा समंक विधायन एवं सारणीयन किया गया। सर्वेक्षण समन्वय प्रभाग (एससीडी) ने विभिन्न सर्वेक्षण गतिविधियों का समन्वय किया।

मैं सर्वेक्षण के विभिन्न चरणों में बहुमूल्य सुझावों एवं मार्गदर्शन हेतु राष्ट्रीय सांख्यिकी आयोग के अध्यक्ष और सदस्यों और एचसीईएस के कार्य दल की अत्यन्त आभारी हूँ। मैं इस दस्तावेज को तैयार करने में सम्मिलित विभिन्न एनएसएसओ प्रभागों के अधिकारियों के प्रति भी आभार व्यक्त करती हूँ।

मुझे उम्मीद है कि यह दस्तावेज नीति निर्माताओं, शिक्षाविदों, शोधकर्ताओं और इस विषय में रुचि रखने वाले अन्य पाठकों के लिए मूल्यवान होगी। इस दस्तावेज के प्रस्तुतीकरण एवं विश्लेषण से संबंधित पाठकों के सुझाव आमंत्रित हैं।

गीता सिंह राठौर

# Preface

The National Sample Survey Office (NSSO) has been regularly conducting Household Consumption Expenditure surveys since its establishment in 1950. The information gathered from these surveys is the primary source for various indicators of living standards across different population segments at the national and state levels. These indicators are essential for planning, policy-making, decision-making, and further statistical analysis by government organizations, academics, researchers, and scholars. The most recent survey was conducted from August 2022 to July 2023.

To reduce the burden on respondents and minimize non-sampling errors, the 2022-23 Household Consumption Expenditure Survey (HCES) employed three distinct questionnaires during consecutive monthly visits. Additionally, the criteria for selecting households were modified to ensure proper representation across all economic levels. The consumption basket was updated to reflect changes in household consumption patterns over the years.

A factsheet with key findings from the survey was released in February 2024, six months after the completion of the survey's fieldwork. This publication is the detailed report of HCES 2022-23, providing estimates of various aspects of household consumption expenditure at both state and all-India levels. The report includes rural and urban averages of Monthly Per Capita Consumption Expenditure (MPCE) at the state/UT and all-India levels, as well as the absolute and percentage breakdown of MPCE by consumption categories and fractile classes for each state/UT and all-India.

The Survey Design and Research Division (SDRD) of the NSSO developed the survey methodology and instruments and prepared this document. The Field Operations Division (FOD) conducted the fieldwork, while the Data Processing Division (DPD) handled data processing and tabulation. The Survey Coordination Division (SCD) coordinated various survey activities.

I am grateful to the Chairman and members of the National Statistical Commission and the Working Group of HCES for their valuable suggestions and guidance throughout the survey. I also express my gratitude to the officers of different NSSO divisions involved in preparing this report.

I hope this report will be valuable to policymakers, academics, researchers, and others interested in this subject. Suggestions for improving its content and coverage are highly appreciated.

Geeta Singh Rathore

Director General

National Sample Survey Office

# HIGHLIGHTS

## Introduction

- ▣ The Household Consumption Expenditure Survey (HCES) is designed to collect information on consumption of goods and services by the households. The information collected in HCES helps to understand the consumption and expenditure pattern, standard of living and well-being of the households.
- ▣ The National Sample Survey Office has been conducting this survey since its inception in 1950. The survey of 2022-23 is the latest one on the subject.
- ▣ The current survey (HCES: 2022-23) has been conducted during the period August, 2022 to July, 2023 in whole of the Indian Union except a few inaccessible villages in the Andaman and Nicobar Islands.
- ▣ The survey has been spread over 8,723 villages covering 1,55,014 households in the rural sector and 6,115 blocks covering 1,06,732 households in the urban sector.

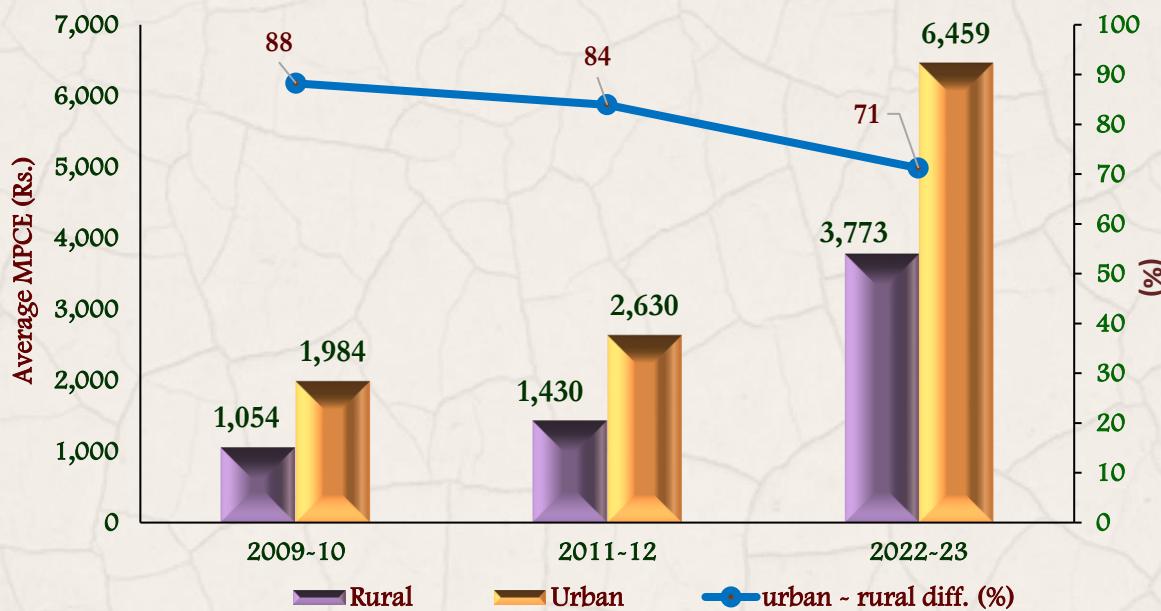

## Indicators compiled

The following indicators have been generated from HCES: 2022-23:

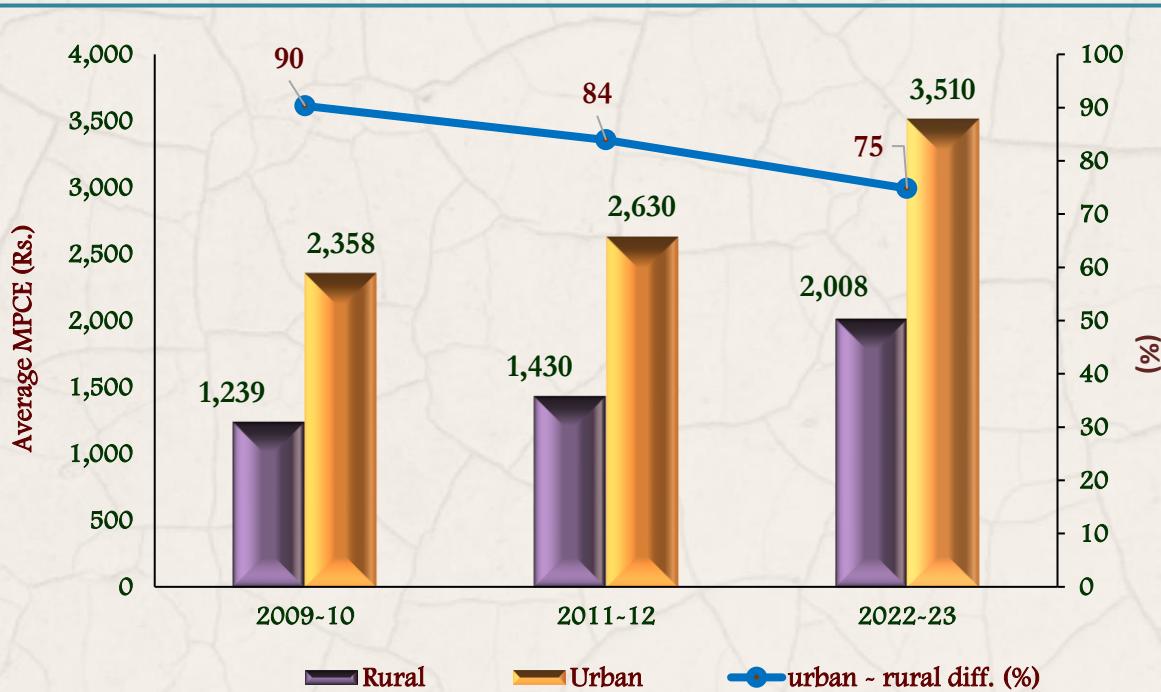

- ▣ **Average Monthly Per Capita Consumption Expenditure (MPCE) by;**
  - ✓ State/UT and All-India;
  - ✓ Fractile classes of MPCE;
  - ✓ Item category of consumption;
  - ✓ Household Type;
  - ✓ Social Group
- ▣ **Average Monthly Per Capita Quantity Consumption of selected items for;**
  - ✓ State/UT and All-India;
  - ✓ Fractile classes of MPCE;
  - ✓ Item category.

## Average MPCE (Rs.) during 2009-10 to 2022-23: All-India

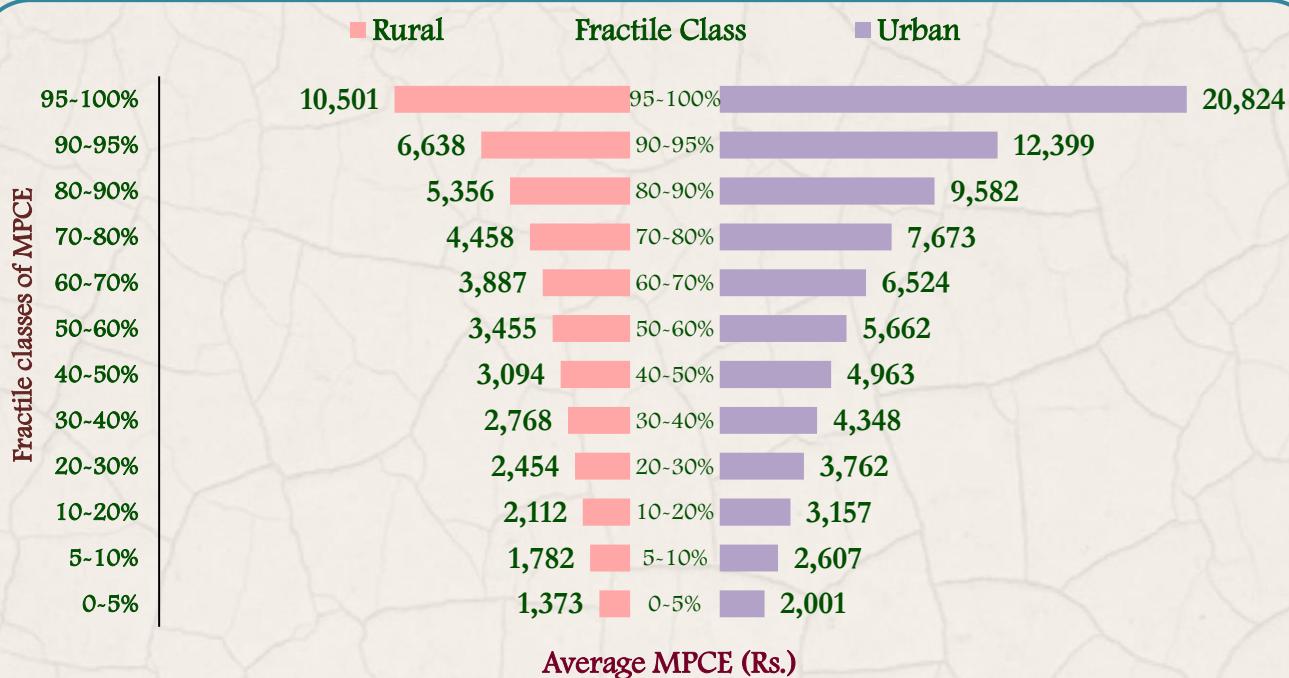

### Average MPCE (Rs.) at nominal price

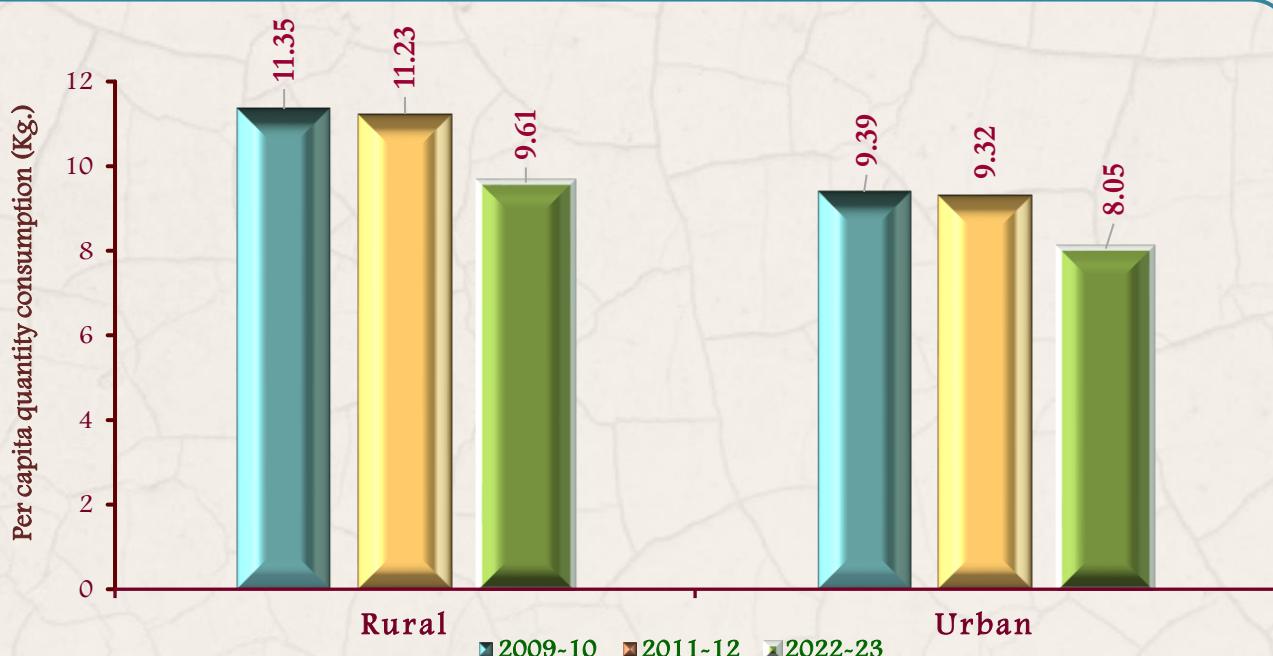

### Average MPCE (Rs.) at 2011-12 prices

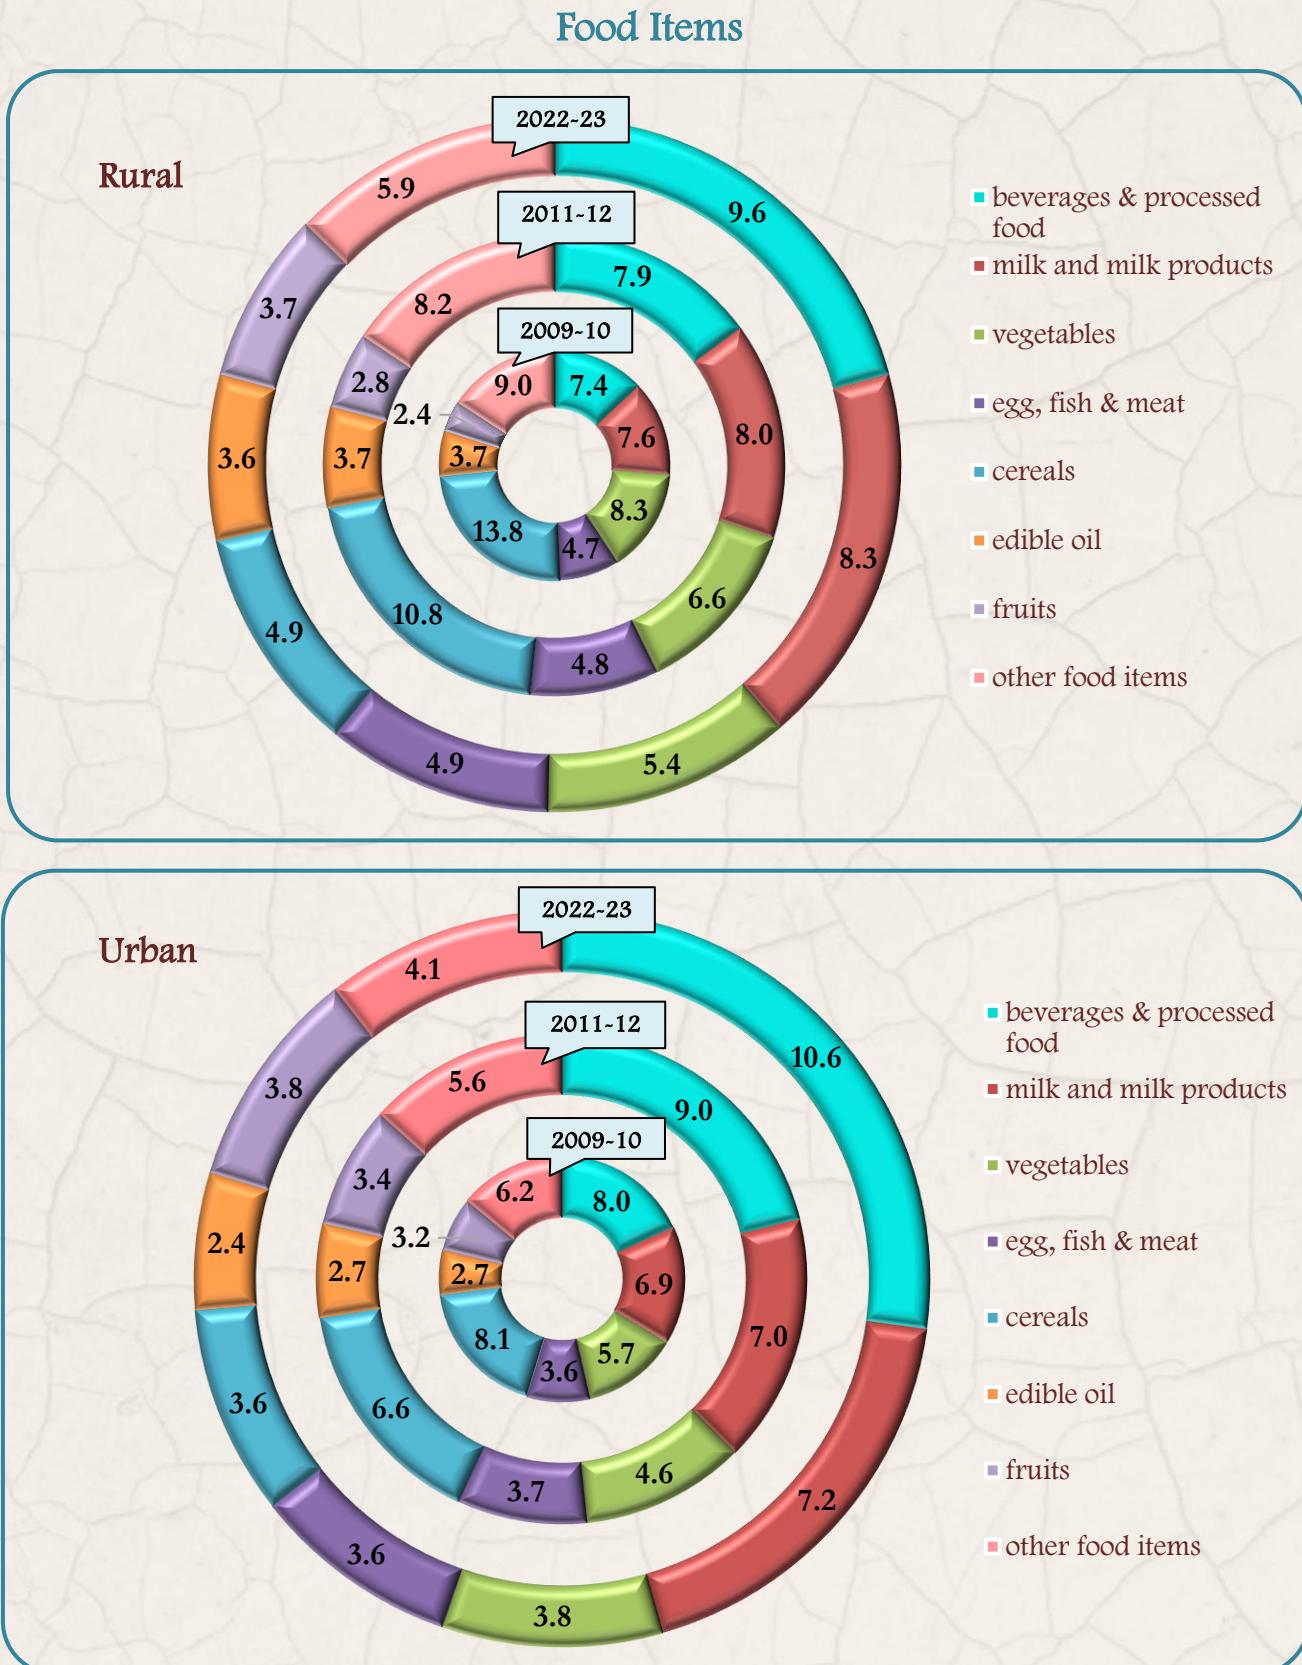

## Average MPCE (Rs.) by Fractile classes in 2022-23: All-India

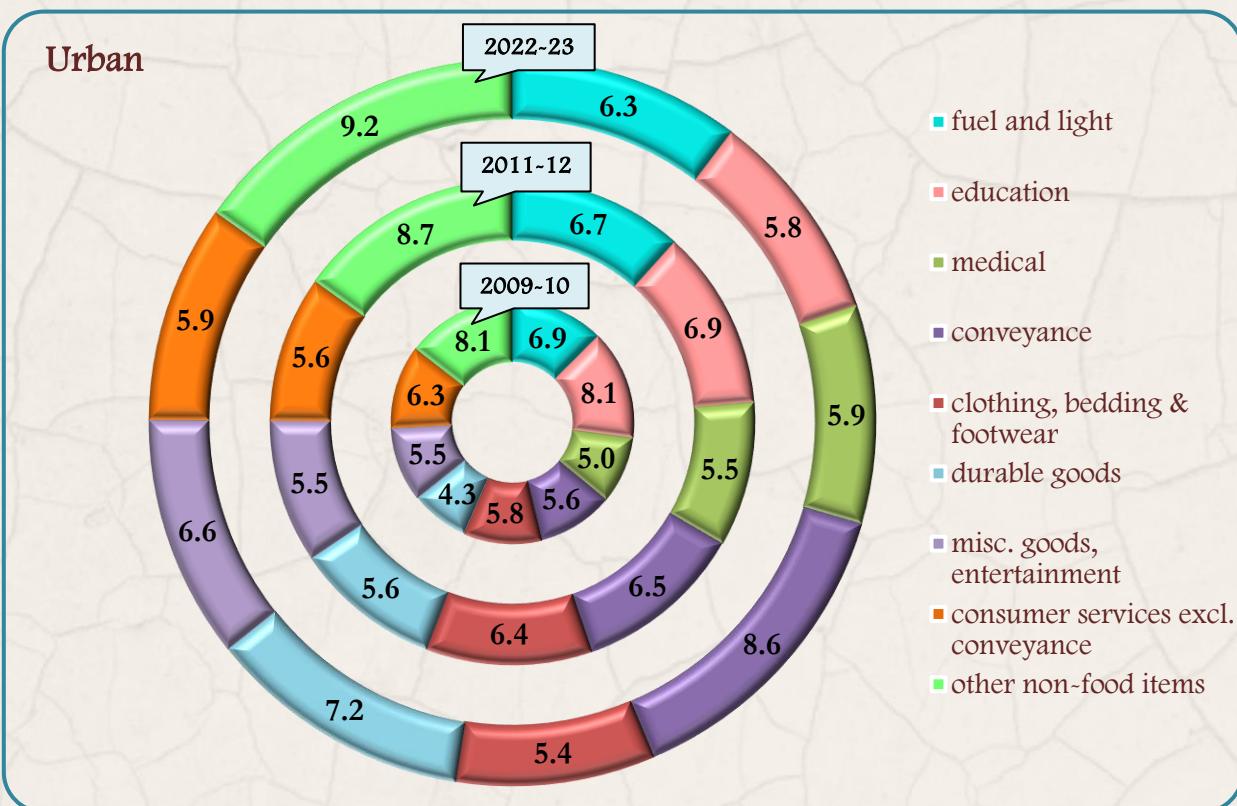

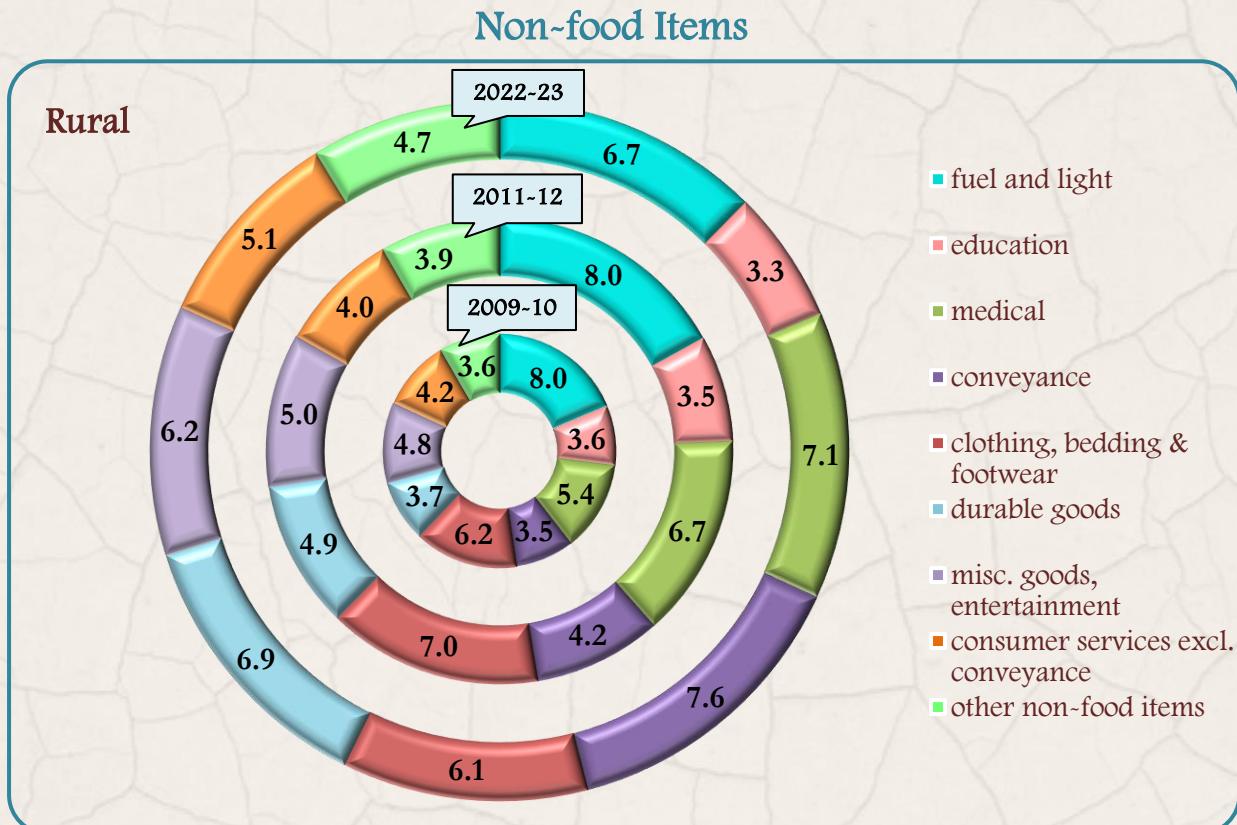

## Per capita quantity consumption of cereals (in Kg.) during 2009-10 to 2022-23: All-India

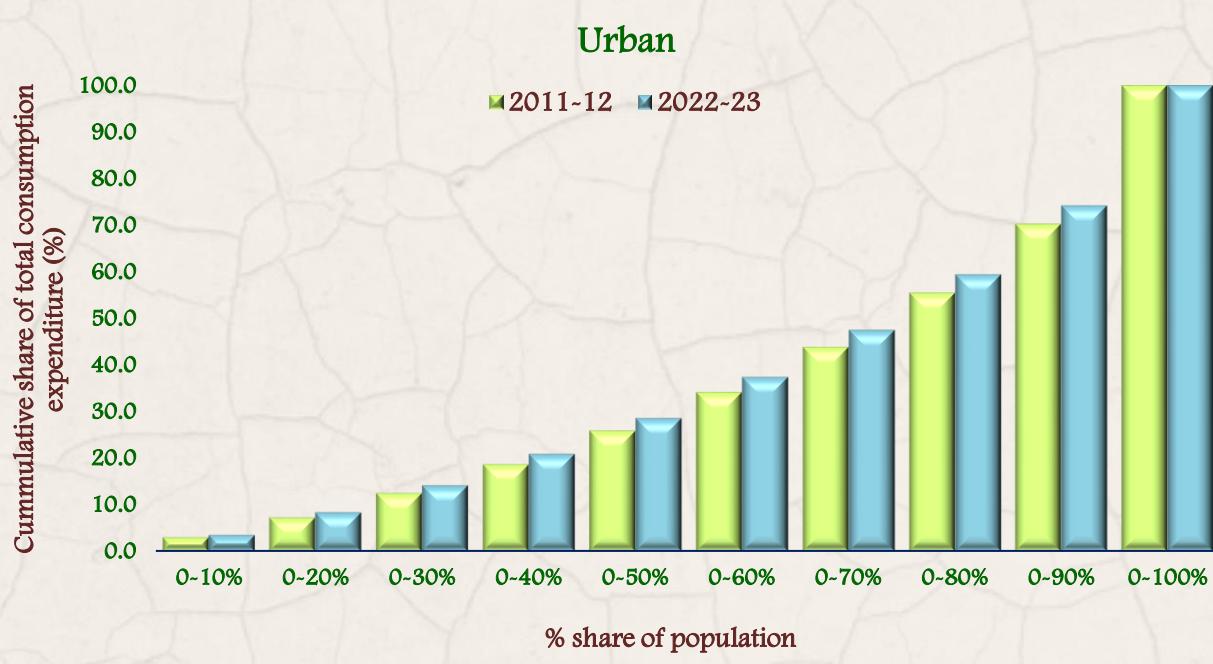

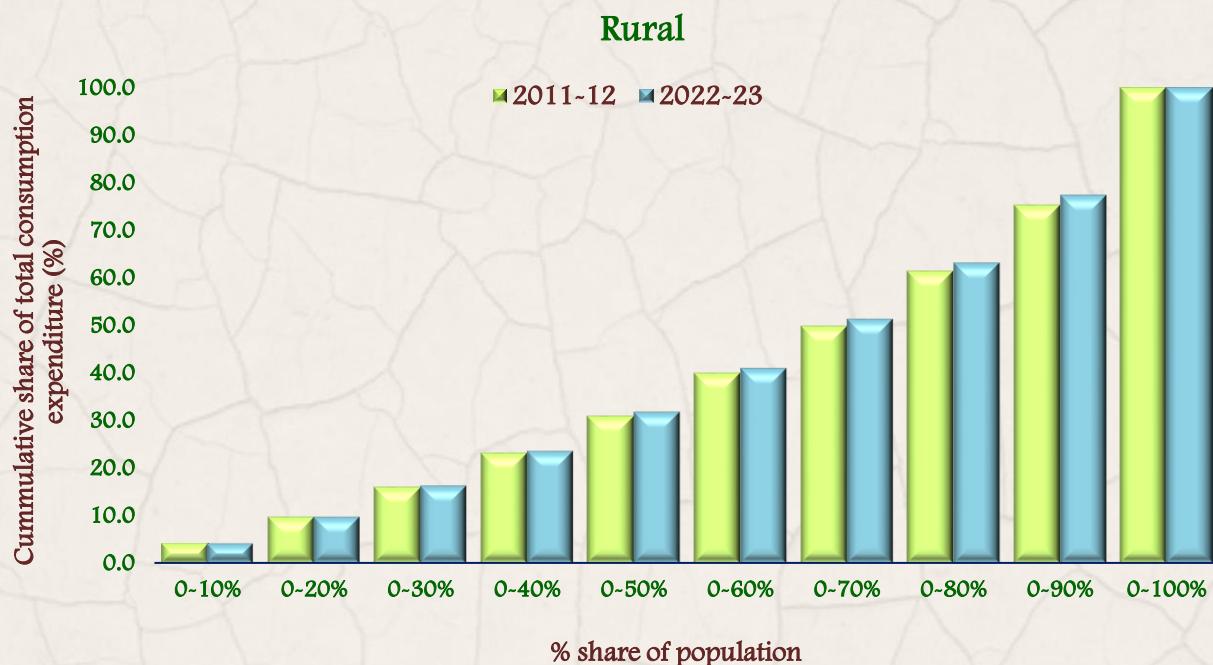

**Trend in share of food items in average MPCE during  
2009-10 to 2022-23: All-India**

**Trend in share of non-food items in average MPCE  
during 2009-10 to 2022-23: All-India**

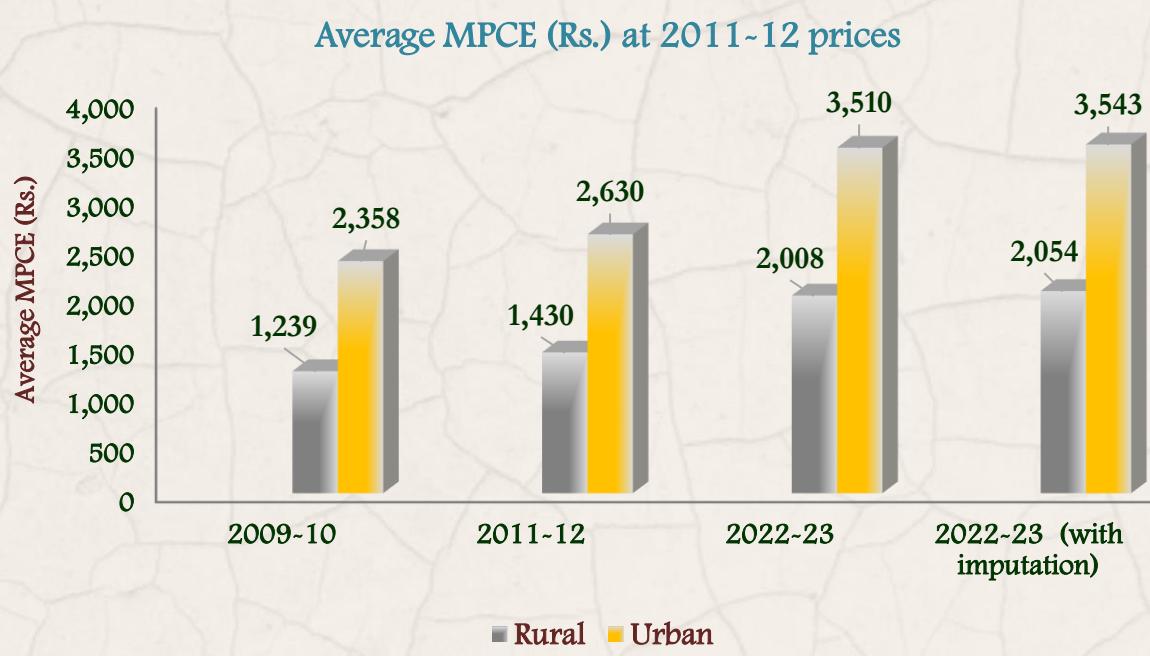

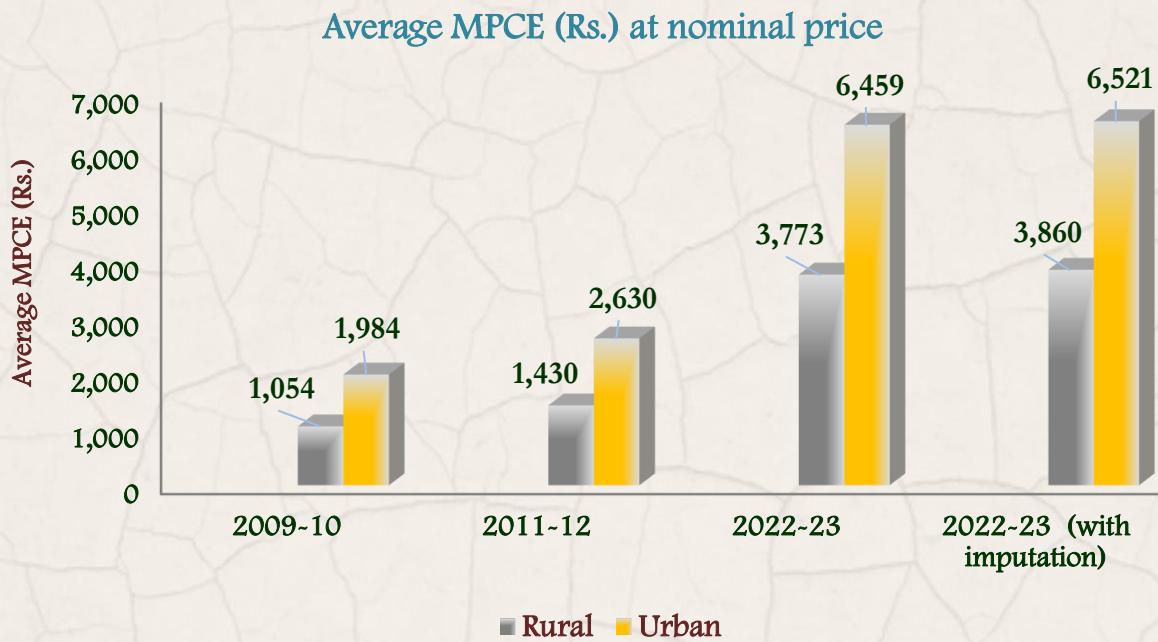

**Cumulative share (%) of different decile classes in total consumption expenditure in 2011-12 and 2022-23: All-India**

*Comparison of the Gini coefficient from HCES:2022-23 with those from 2011-12 shows a decline, from 0.283 to 0.266 for the rural sector and from 0.363 to 0.314 for the urban sector of the country.*

## Comparison of average MPCE (in Rs.): Without and With imputation in nominal and real price: All-India

# *Chapter One*

## *Introduction*

### **1.1 BACKGROUND**

---

1.1.0 The Household Consumption Expenditure Survey (HCES) is designed to collect information on consumption of goods and services by the households. The survey also collects some auxiliary information on household characteristics and demographic particulars of the members of the households. Information collected in HCES is useful for understanding the consumption pattern, standard of living and hence, well-being of the households. Besides, the data of the survey provides budget shares of different commodity groups that is used for preparation of the weighting diagram for compilation of official Consumer Price Indices (CPIs). The data collected in HCES is also utilized, *inter alia*, for deriving various other macroeconomic indicators.

1.1.1 Acknowledging the importance of the survey, the National Statistical Commission (NSC) recommended to undertake HCES during July, 2020 to June, 2021. Consequently, it was decided to conduct two consecutive surveys during 2020-21 and 2021-22 to facilitate a decision on the choice of an appropriate period for the revision of the ‘base year’ for macroeconomic indicators. However, due to the emergence of Covid-19 pandemic, the survey of 2020-21 could not be started. The first of the two consecutive surveys began in August, 2022 and continued till July, 2023, after the situation became conducive for conduct of survey fieldwork. The survey has been renamed as “Household Consumption Expenditure Survey (HCES)” from erstwhile “Household Consumer Expenditure Survey” following the suggestion of the NSC.

## 1.2 PAST SURVEYS

---

1.2.0 The National Sample Survey Office (NSSO) has been conducting household surveys on consumption expenditure at regular intervals as part of its rounds, normally of one-year duration. The data on household consumption expenditure were collected in every round up to the 28<sup>th</sup> (1973-74) from the first round (1950-51) of the National Sample Survey (NSS). After the 26<sup>th</sup> round of the survey, the then Governing Council of NSSO decided to conduct the surveys on consumption expenditure and employment-unemployment together on a large scale, once in every five years. From the 42<sup>nd</sup> round (1986-87), on the basis of the recommendation of the Governing Council, NSS had started annual surveys of consumption expenditure in a smaller-scale with an abridged version of the schedule and thin sample. This annual series was continued till NSS 64<sup>th</sup> round (2007-08). The quinquennial surveys were conducted and results were published in the 27<sup>th</sup> (1972-73), 32<sup>nd</sup> (1977-78), 38<sup>th</sup> (1983), 43<sup>rd</sup> (1987-88), 50<sup>th</sup> (1993-94), 55<sup>th</sup> (1999-'00), 61<sup>st</sup> (2004-05), 66<sup>th</sup> (2009-10) and 68<sup>th</sup> (2011-12) rounds of NSS, at roughly 5-year intervals. The survey of 2022-23 is the latest one on the subject.

## 1.3 SURVEY COVERAGE

---

### 1.3.1 Geographical Coverage

---

1.3.1.0 The survey covered the whole of the Indian Union except a few inaccessible villages in the Andaman and Nicobar Islands. Information in the survey was collected from 8,723 villages and 6,115 urban blocks spread over the entire country covering 2,61,746 households (1,55,014 in rural areas and 1,06,732 in urban areas). The distribution of the villages/urban blocks and households surveyed across different States/UTs for rural and urban areas is given in Table 1.1 at the end of this Chapter.

### **1.3.2 Population Coverage**

---

1.3.2.0 All resident households located in the geographical territory of Indian union were considered in the survey with the following exclusions:

1.3.2.1 Floating population, i.e., persons without any normal residence, was excluded from the coverage of the survey. But persons residing in open spaces, roadside shelters, under bridges etc., more or less regularly in the same place were covered.

1.3.2.2 Foreign nationals as well as their domestic servants were excluded, if by definition the latter belonged to the foreign national's household. However, a foreign national who had become an Indian citizen for all practical purposes was covered.

1.3.2.3 Persons residing in barracks of military and paramilitary forces (like police, Border Security Force, etc.) were kept outside the survey coverage. However, civilian population residing in their neighbourhood, including the family quarters of service personnel was covered.

1.3.2.4 Orphanages, rescue homes, ashrams and vagrant houses were outside the survey coverage. However, the persons staying in old age homes, the students staying in ashram/hostels and the residential staff (other than monks/nuns) of these ashrams were covered. Although orphans living in orphanages were excluded, the persons looking after them and staying there were covered. Convicted prisoners undergoing sentence were kept outside the coverage of the survey.

## **1.4 QUESTIONNAIRES FOR THE SURVEY**

---

1.4.1 The consumption basket of items was divided into three broad categories, namely, (i) Food items, (ii) Consumables and Services items, and (iii) Durable goods in HCES: 2022-23. Thereafter, three separate questionnaires, namely, Questionnaire: FDQ, Questionnaire: CSQ and Questionnaire: DGQ covering the three categories were designed and canvassed in the selected households in three separate consecutive monthly visits. Another questionnaire, viz., Questionnaire: HCQ was used to collect

information on household characteristics and demographic particulars of the members of the households.

1.4.2 All possible six sequencing of the three questionnaires, namely, [(Q1, Q2, Q3), (Q1, Q3, Q2), (Q2, Q1, Q3), (Q2, Q3, Q1), (Q3, Q1, Q2) and (Q3, Q2, Q1)], where Q1 refers to FDQ, Q2 refers to CSQ and Q3 refers to DGQ, were used in the survey to eliminate any bias due to adoption of any particular sequencing of the questionnaires. The questionnaires are provided in Appendix D.

## 1.5 REFERENCE PERIOD

---

1.5.0 The consumption of any good or service by members of a household (individually or collectively) occurs in the form of a flow over time. The time period for which consumption is recorded is called the reference period. It may vary from item to item. As the respondents are asked to recall and report the volume of consumption over a fixed duration, the reference period is also called the recall period.

1.5.1 The reference periods used in the survey for different groups of items are given below:

Category	Item groups	Reference period
I	Edible oil; egg, fish & meat; milk and milk products; vegetables; fruits; spices; beverages and processed foods; pan, tobacco & intoxicants	Last 7 days
II	All other food items; fuel and light; miscellaneous goods and services including medical (non-hospitalization) and rents	Last 30 days
III	Clothing; bedding; footwear; education; medical (hospitalization); durable goods	Last 365 days

1.5.2. Together, these reference periods are termed as Modified Mixed Reference Period (MMRP). Other reference periods used in past NSS surveys on household

consumption are: Uniform Reference Period (URP) and Mixed Reference Period (MRP).

1.5.3 In URP approach, the household consumption expenditure on each item is recorded for a reference period of “last 30 days” while in MRP, the household consumption expenditure on - (i) clothing and bedding, footwear, education, institutional medical care, and durable goods is recorded for a reference period of “last 365 days”, and (ii) expenditure on all other items is recorded for a reference period of “last 30 days”.

## **1.6 HOUSEHOLD**

---

1.6.0 A group of persons normally living together and taking food from a common kitchen constitutes a household. It includes temporary stay-aways (those whose total period of absence from the household is expected to be less than 6 months during the survey period) but excludes temporary visitors and guests (expected total period of stay less than 6 months during the survey period).

1.6.1 Each inmate of a mess, hotel, boarding and lodging house, hostel, etc., is considered as a single member household except that a family living in a hotel (say) is considered as one household only; the same applies to residential staff of such establishments. Under-trial prisoners in jails and indoor patients of hospitals, nursing homes, etc., are considered as members of the households to which they last belonged.

## **1.7 HOUSEHOLD SIZE**

---

1.7.0 The size of a household is the total number of persons in the household.

## 1.8 HOUSEHOLD CONSUMPTION EXPENDITURE

---

1.8.0 It is the expenditure incurred by a household on domestic consumption during the reference period. Expenditure incurred towards entrepreneurial activities of households is excluded from household consumption expenditure.

1.8.1 The expenditure on purchase and construction of residential land and building, interest payments, insurance premium payments, payments of fines and penalties, and expenditure on gambling including lottery tickets are also excluded. Money given as remittance, charity, gift, etc. is also not considered in consumption expenditure. However, consumption of items produced in own farm or household enterprise is valued and included in household consumption expenditure. Also, goods and services received as payment in kind or free from employer, such as rent-free accommodation and free medical care, and reimbursement of travelling allowance for self & family excluding allowance for business trips are considered in household consumption expenditure.

1.8.2 For items of food, pan, tobacco, intoxicants and fuel & light, household consumption is measured by the quantity of the item actually used by the household during the reference period, irrespective of the expenditure incurred on it. For evaluating household consumption of all other items, a different approach is followed: the expenditure made by the household during the reference period for the purchase or acquisition of goods and services, regardless of when the goods and services are used and by whom, is considered as household consumption.

18.3. However, for some items such as rent, telephone charges, consumer taxes and railway season tickets, etc. expenditure during the month is recorded as the amount that was last paid divided by the number of months for which the payment was made.

1.8.4 The consumption of an item may be out of (a) purchases made in cash or credit during the reference period; (b) home-grown stock; (c) receipts in exchange of goods

and services; (d) any other receipt like gift, charity and (e) free collection. Home produce items are evaluated at ex-farm price.

1.8.5 It is pertinent to mention here that the consumption expenditure of a household on food items relates to the actual consumption by the members of the household and also for the guests during ceremonies or otherwise. Any transfer payment made by the household such as, transfers of food, fuel made by a household as charity, loan advance etc. are not considered as consumption of that household. However, meals prepared in a household and served to non-household members are an exception to this rule. Meals prepared in the household's kitchen and provided to the employees and/or others are considered in domestic consumption of employer (payer) households. There is a practical difficulty in estimating the quantities and values of individual items used for preparing the meals served to employees or others. Thus, to avoid double counting, 'cooked meals received as perquisites' from the employer household or as gifts or charity are not recorded in the recipient household. As a general principle, cooked meals purchased by the household from the market for consumption by the members and the guests are also recorded in the purchaser household.

1.8.6 All goods and services received as payment in kind or perquisites are included in the consumption of the recipient household as goods and services received in exchange of services, except for meals received from other households.

1.8.7 With a view to simplify data collection, consumption of food processed at home from one "item" to another, such as milk converted to curd, vegetables used for pickles, and rice used for making liquor etc. are recorded against the primary or ingredient item(s), such as milk instead of curd, vegetables instead of pickle etc.

## 1.9 VALUE OF CONSUMPTION

---

1.9.0 For food, pan, tobacco, intoxicants and fuel & light items, consumption out of purchase is evaluated at the purchase price. Consumption out of home produce is

evaluated at ex-farm price. Value of consumption out of gifts, free collections, and goods received in exchange of goods and services is imputed at the rate of average local retail prices prevailing during the reference period. Such valuation is made by the field officials at the time of collection of the data.

## **1.10 MONTHLY PER CAPITA CONSUMPTION EXPENDITURE (MPCE)**

---

1.10.0 The Monthly Per Capita Consumption Expenditure (MPCE) is defined as: total household monthly consumption expenditure divided by the household size. This measure serves as an indicator of the household's level of living.

1.10.1 Each individual's MPCE is defined as the MPCE of the household to which the person belongs. This assigns to each person a number representing his or her level of living. Thus, the intra-household allocation among the members of the household is ignored.

## **1.11 FRACTILES AND FRACTILE CLASSES OF MPCE**

---

1.11.0 For any fraction  $f(0 < f < 1)$ , the corresponding fractile of the distribution of MPCE is the level of MPCE  $Y_f$  such that the proportion of population whose household MPCE lies below  $Y_f$  is  $f$ . A fractile class of MPCE is a segment of the population lying within two fractiles,  $f_1$  and  $f_2$ .

1.11.1 In this report, twelve fractile classes, represented as "0-5%", "5-10%", "10-20%", ..., "95-100%" are used. Each of the first two classes contain 5% of the estimated population ranked by MPCE in ascending order, i.e., the bottom 5% of the estimated population belongs to the class "0-5%". Each of the next eight classes contain 10% of the estimated population ranked by MPCE in ascending order. The last two classes contain 5% each of the estimated population in which the fractile class "95-100%" represents top 5% of estimated population when ranked by MPCE in ascending order.

1.11.2 Estimates are often generated separately, for different fractile classes to assess the variation of any characteristics with variation in MPCE. In this report, MPCE fractile classes, formed separately for different States/UTs and at all-India level for rural and urban sectors have been used.

## **1.12 ISSUES RELATED TO COMPARABILITY**

---

1.12.0 HCES: 2022-23 has undergone some changes as compared to the previous surveys on consumption expenditure. A brief account of the changes made in this survey are given below.

- (i) **Item Coverage:** The questionnaire used in HCES: 2011-12 (NSS 68<sup>th</sup> round) had around 347 items. In HCES: 2022-23, the questionnaire has been updated by inclusion of new items and merging some of the obsolete items together. The questionnaire of HCES: 2022-23 contains 405 items.
- (ii) **Changes in Questionnaire:** A single questionnaire has been used in all NSS surveys on household consumption expenditure prior to HCES: 2022-23. However, in HCES: 2022-23, three separate questionnaires covering (i) food items, (ii) consumables and services items and (iii) durable goods have been used. Further, another questionnaire has been canvassed for collecting information on household characteristics as well as demographic particulars of the members of the households.
- (iii) **Multiple Visits for Data Collection:** Contrary to the usual practice of single visit followed prior to 2022-23, three questionnaires, namely, FDQ, CSQ & DGQ have been canvassed at random in HCES: 2022-23 in a selected household in three consecutive monthly visits in a quarter. The questionnaire HCQ has always been canvassed during the first visit along with one of these three questionnaires.

(iv) **Change in Mode of Data Collection:** Computer-Assisted Personal Interview (CAPI) method has been adopted in HCES: 2022-23 while all earlier surveys on the subject have been conducted in Pen-and-Paper Personal Interview (PAPI) method.

1.12.1 These are required to be noted while comparing the results of HCES: 2022-23 with those of the previous surveys.

## **1.13 MAJOR STATES**

---

1.13.0 This refers to the 18 States of India which had a population of 25 million or more according to the Census of 2011. The States are: Andhra Pradesh, Assam, Bihar, Chhattisgarh, Gujarat, Haryana, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Odisha, Punjab, Rajasthan, Tamil Nadu, Telangana, Uttar Pradesh and West Bengal.

1.13.1 The state of Telangana was created in the year 2014 carving out from the state of Andhra Pradesh. However, considering the total population of Andhra Pradesh according to 2011 population Census, both Andhra Pradesh and Telangana have been included in the list of major states.

## 1.14 CONTENTS OF THIS DOCUMENT

---

1.14.0 This report is based on the Household Consumption Expenditure Survey conducted during August, 2022 to July, 2023. The report contains three Chapters with summary statements. The detailed tables are included in the appendix. This Chapter being an introductory one, provides a brief background of the survey in addition to elucidating some concepts and definitions used in the survey. Chapter 2 outlines the survey methodology and estimation procedure while the findings of the survey are summarized in Chapter 3. The detailed tables of indicators, namely, MPCE, per capita quantity consumption etc. at State/UT level are included in Appendix A. The detailed estimation procedure is presented in Appendix B. As a measure of efficacy of the estimates, the values of relative standard errors (RSE) of the MPCE figures for each State/UT are given in Appendix C and the survey questionnaires are included in Appendix D.

**Table 1.1: Number of FSUs and number of households surveyed**

State/UT/All-India	No. of FSUs (villages/blocks)		No. of sample households		
	Rural	Urban	Rural	Urban	Rural + Urban
Andhra Pradesh	357	235	6,245	4,025	10,270
Arunachal Pradesh	158	80	2,581	1,440	4,021
Assam	338	140	6,045	2,517	8,562
Bihar	759	199	13,602	3,564	17,166
Chhattisgarh	160	120	2,867	2,141	5,008
Delhi	20	200	305	2,931	3,236

\*: All India figures include rural households from uninhabited villages those have been considered as a special stratum.

# *Chapter Two*

## *Survey Method & Estimation of MPCE*

### **2.1 SAMPLING DESIGN**

---

2.1.0 A multistage stratified sampling design, considering villages/urban blocks as the first stage units has been used in the survey. The households are the ultimate stage units. Simple Random Sampling Without Replacement (SRSWOR) method is used for selecting the samples.

2.1.1 In order to ensure proper representation of households of different economic categories, all the households of a selected village/urban block are classified into three groups depending on a criterion based on (i) land possessed in rural areas and (ii) possession of car in urban areas as on the date of the survey. A total of 18 households with proportional representation from the three groups have been selected. The details of survey methodology and estimation procedure are provided in Appendix B.

### **2.2 ESTIMATION OF MPCE**

---

2.2.0 The monthly per capita consumption expenditure (MPCE) of a household, defined as "*the total value of monthly consumption of goods & services of the household divided by the number of members of the household*" is based on the data collected from those households who provided information for all the three visits, i.e., the households from whom data pertaining to all the three questionnaires, namely, FDQ, CSQ and DGQ are available. The multiplier computed from the data of third visit is used for

generation of the estimates. Household size recorded at the time of canvassing of food questionnaire (FDQ) is considered for calculating the MPCE.

2.2.1 Considering E1, E2 & E3 as the total value of expenditure on food, consumable & services and durable items respectively for a particular selected household, compiled from the three questionnaires, namely FDQ, CSQ & DGQ and assuming P1, P2 & P3 as the number of household members (i.e., size of the household) recorded during the time of canvassing FDQ, CSQ and DGQ questionnaire, respectively, the total monthly expenditure of the household, (say, *TE*) is computed as:

$$TE = E1 + (E2/P2) \times P1 + (E3/P3) \times P1.$$

Consequently, the MPCE of the household is computed as:

$$MPCE = TE/P1.$$

2.2.2 It has been a practice in NSS household consumption expenditure surveys to impute the value figures at the time of collection of data in the field for consumption out of (i) home-grown/home-produced stock and (ii) gifts, free collection and goods received in exchange of goods and services etc. The same practice has been continued in HCES: 2022-23 and accordingly, estimates of MPCE have been generated. These estimates are presented in Section I of Chapter 3.

2.2.3 In view of the fact that there has been a significant increase in the quantum of social transfers of food and non-food items to the households through a number of Social Welfare Schemes, the National Statistical Commission suggested that some provision should be incorporated in the survey questionnaires of HCES to collect information on items/services received free of cost by the households through such schemes. Accordingly, a separate provision for collection of information on the quantity of consumption for a number of items, received and consumed by the households free of cost through various social welfare programmes, has been made in HCES: 2022-23. Consequently, the value figures for (i) food items: Rice, Wheat/Atta, Jowar, Bajra, Maize, Ragi, Barley, Small Millets, Pulses, Gram, Salt, Sugar, Edible Oil and (ii) non-food items: Laptop/PC, Tablet, Mobile Handset, Bicycle, Motor Cycle/Scooty, Clothing (School uniform), Footwear (School shoe etc.) received free of

cost by the households has been imputed using an appropriate method, in addition to the items as mentioned in para 2.2.2 above. Thereafter, another set of estimates of MPCE has been generated for HCES: 2022-23. These estimates, referred as 'MPCE estimates with imputation' are presented in Section II of Chapter 3.

2.2.4 It may be noted that the benefits provided under PM-JAY or any other state specific schemes provide cashless access to healthcare services for the beneficiary at the point of service, i.e., hospital and the beneficiary does not have any information on the cost of the services availed. For such schemes, entire premium is borne by the Government and the beneficiary does not contribute. Since HCES is not a record-based survey, often it is not possible to ascertain the exact ailment or disease for which the benefit has been availed. Hence, in view of the complexity and appropriateness involved in imputation of the expenditure for such services, no attempt has been made to impute the expenditure of health services availed by the households free of cost. For similar reasons, the expenditure for free education services (i.e., reimbursement/waiver of school or college fees) has also not been imputed.

## **2.3 METHOD USED FOR IMPUTATION OF VALUE**

---

2.3.0 In HCES: 2022-23, a provision has been made to collect information on the quantity of consumption for a number of items received and consumed by households free of cost through various social welfare programmes. Subsequently, it has been decided to generate a second set of estimates of MPCE considering the imputed values of the following items:

<b>Free Food Items</b>			
<b>Sl. No.</b>	<b>item</b>	<b>Sl. No.</b>	<b>item</b>
1	rice-free (061)	8	ragi-free (067)
2	wheat/atta-free (062)	9	small millets-free (068)
3	coarse grains-free (070)	10	pulse-free (071)
4	jowar-free (063)	11	gram-free (072)
5	bajra-free (064)	12	salt-free (073)
6	maize-free (065)	13	sugar-free (074)
7	barley-free (066)	14	edible oil-free (075)

<b>Free Non-food Items</b>			
<b>Sl. No.</b>	<b>item</b>	<b>Sl. No.</b>	<b>item</b>
1	Laptop/PC (S. No. 1, Q4.3.2)	5	Motorcycle/ Scooty (S. No. 5, Q4.3.2)
2	Tablet (S. No. 2, Q4.3.2)	6	Clothing (School Uniform etc.) (S. No. 6, Q4.3.2)
3	Mobile handset (S. No. 3, Q4.3.2)	7	Footwear (School Shoe etc.) (S. No. 7, Q4.3.2)
4	Bicycle (S. No. 4, Q4.3.2)		

2.3.1 The value figures of these free items have been imputed by identifying the unit price at which the beneficiary household would have bought the same if it is not received free of cost. While deciding on an appropriate method of imputation, it has been assumed that all households belonging to a particular sector, state and second stage stratum (SSS) are homogeneous in terms of purchasing power and have more or less similar consumption pattern. Besides, consideration of a representative unit price for each of the imputed items at Sector × State × Second Stage Stratum (SSS) level would also address the variation in state-level prices. Thus, the adopted imputation method has been essentially based on finding an item-wise unit price at which the majority of the households would have purchased the item during the reference period.

2.3.2 In the questionnaires of HCES, in addition to collection of information on quantity figures for items received free of cost, there is provision for gathering information on quantity and value of each of these items consumed by the households ‘out of purchase’ during the reference period. From these quantity and value figures of each of the items consumed by the households ‘out of purchase’, item-level unit prices (value/quantity) are calculated for all households belonging to a particular Sector × State × Second Stage Stratum (SSS) level combination. Thereafter, the modal unit price for a particular item is determined at Sector × State × SSS level. In the absence of availability of sufficient number of observations at Sector × State × SSS level, the modal unit values are determined at Sector × State level. Using these item-wise modal unit prices, the total value of consumption of a particular free item is imputed as:

*Imputed value = Quantity consumed × Modal unit value.*

2.3.3 For computation of Mode, Kernel Density Estimation procedure has been used i.e., each discrete point (i.e., each unit value) has been replaced by Gaussian distribution (kernel). The probability density at any given point in the space is then estimated to be the sum of the kernels at the chosen point over all the discrete points (after proper normalization). The rule-of-thumb bandwidth estimator has been used to approximate the width of a kernel or bandwidth.

2.3.4 In most of the cases while computing unit prices, it has been observed that sufficient observations are not present for at least one SSS (out of three) at Sector × State level. Therefore, to maintain uniformity, the unit prices for each item are calculated at the Sector × State level.

2.3.5 The items that have been considered for imputation of the value figures of the items received free of cost are given in the tables below:

<b>Free Items and corresponding item(s) considered for imputation: Food</b>	
<b>Item (value) imputed</b>	<b>Item(s) considered for imputation</b>
rice-free (061)	rice-other sources (102)
wheat/ atta-free (062)	wheat/ atta-other sources (108)
coarse grains-free (070)	coarse grains - other sources (002)
jowar-free (063)	jowar-other sources (115)
bajra-free (064)	bajra-other sources (116)
maize-free (065)	maize-other sources (117)
barley-free (066)	barley-other sources (118)
ragi-free (067)	ragi-other sources (121)
small millets-free (068)	small millets-other sources (120)
pulse-free (071)	items 140, 141, 143, 144, 145 & 148
gram-free (072)	gram whole-other sources (142)
salt-free (073)	salt-other sources (170)
sugar-free (074)	sugar-other sources (172)
edible oil-free (075)	items 181, 184, 182 & 183

<b>Free Items and corresponding item(s) considered for imputation: Durables</b>	
<b>Item (value) imputed</b>	<b>Item(s) considered for imputation</b>
Laptop/PC (S. No. 1, Q4.3.2)	item 622 with value > Rs. 5000
Tablet (S. No. 2, Q4.3.2)	item 622 with value > Rs. 5000
Mobile handset (S. No. 3, Q4.3.2)	Mobile handset (item 623)
Bicycle (S. No. 4, Q4.3.2)	Bicycle (item 600)
Motorcycle/ Scooty (S. No. 5, Q4.3.2)	Motorcycle, scooter (item 601)
Clothing (School Uniform etc.) (S. No. 6, Q4.3.2)	Unit value = (Total value reported in items 356 & 357 of Section 13.1)/number of members attending government institution as reported in Q4.2.3 of Section 4.2
Footwear (School Shoe etc.) (S. No. 7, Q4.3.2)	items 390 & 394 of Section 13.2

## 2.4 EFFICACY OF THE ESTIMATES OF MPCE

---

2.4.0 The efficacy of the estimates of average MPCE values for each State/UT has been measured in terms of Relative Standard Error (RSE), defined as:

$$RSE = \frac{\text{Standard Error}}{\text{Estimate}} \times 100 \text{ %}.$$

2.4.1 The formula used for estimation of the RSE is provided in Appendix B. The estimated RSE values along with 95% confidence intervals for estimates of average MPCE figures are given in Appendix C.

# *Chapter Three*

## *Summary of Findings*

### **3.1 INTRODUCTION**

---

3.1.0 The prime indicator generated from the Household Consumption Expenditure Survey (HCES) is the average Monthly Per Capita Consumption Expenditure (MPCE), compiled at various level of disaggregation, namely, by sector, State/UT or with regard to various characteristics of the households like household type, social group, etc. In addition, share of expenditure incurred on consumption of different types of items, share in quantity of consumption of various food items are also compiled from the information collected in HCES. Accordingly, discussions on the survey findings in this chapter are confined predominantly to these parameters. In addition, trend in MPCE covering past few NSS surveys on household consumption expenditure along with pattern in inequality in household consumption expenditure are also included in this Chapter.

3.1.1 As discussed in para 2.2.3 of Chapter 2, information on the quantity of consumption for a number of items, received and consumed by the households free of cost through various social welfare programmes has been collected in HCES: 2022-23. Consequently, the value figures for (i) food items: Rice, Wheat/ Atta, Jowar, Bajra, Maize, Ragi, Barley, Small Millets, Pulses, Gram, Salt, Sugar, Edible Oil and (ii) non-food items: Laptop/PC, Tablet, Mobile Handset, Bicycle, Motor Cycle/Scooty, Clothing (School uniform), Footwear (School shoe etc.) received free of cost by the households have been imputed using an appropriate method.

3.1.2 As a consequence, two sets of estimates of MPCE have been generated from HCES: 2022-23. The first one is adopting the usual NSS practice of imputation of the value figures at the time of collection of data in the field for consumption out of home-grown/home-produced stock and; gifts, free collection and goods received in exchange of goods and services, etc. These estimates are presented in Section I of the present Chapter.

3.1.3 Another set of estimates of MPCE has been generated utilizing the imputed value figures of the items as mentioned in para 3.1.1 above in conjunction with adoption of usual NSS practice of imputation of values figures for the items by the field personnel as explained earlier. These estimates, referred as 'MPCE estimates with imputation' are presented in Section II of this Chapter.

3.1.4 The 'MPCE estimates with imputation' are derived using the imputed values of the items as mentioned in para 3.1.1 above. Thus, the estimates of MPCE using the conventional NSS practice and 'MPCE estimates with imputation' will vary. Accordingly, *for any domain or classification, the fractile classes of MPCE for the two types of MPCE figures will not be identical due to the fact that the set of households in the corresponding fractile classes will not, in general, be identical. Hence, any comparison of either MPCE values or share of expenditure between the two sets of MPCE estimates across the fractile classes to assess the impact of social welfare schemes will not be meaningful. Consequently, estimates of MPCE values with imputation as well as various types of cross-classifications of the same by fractile classes of MPCE have not been generated.*

3.1.5 Further, the fractile classes for rural and urban areas have been determined separately. Similarly, state-specific fractile classes are also derived and state-wise estimates for these classes are given in the detailed tables in Appendix A.

3.1.6 Apart from the average MPCE, the survey data has also been used to generate estimates of various parameters, separately for households for different fractile classes of MPCE. Among these, the absolute and percentage break-up of MPCE over categories of consumption items, and quantity and value of per capita consumption of different cereals are important indicators.

3.1.7 The discussions in this chapter covers the following broad categories for rural and urban sectors:

- (a) average MPCE and MPCE across fractile classes,
- (b) trend in level of consumption,
- (c) median and deciles of the distribution of population by MPCE,
- (d) average MPCE across household size,
- (e) share of various food and non-food item groups in total expenditure,
- (f) inter-state variation in food and cereal consumption,
- (g) trend in per capita quantity consumption of cereals,
- (h) inter-state variation of expenditure for different food and non-food items,
- (i) trend in pattern of consumption of broad item groups,
- (j) average MPCE across social groups,
- (k) average MPCE across household types,
- (l) inequality in distribution of MPCE,
- (m) efficacy of the estimates of MPCE,
- (n) comparison of two types of estimates of MPCE figures.

## 3.2 SECTION I: ESTIMATES OF MPCE

---

3.2.0 The estimates presented in this section have been generated without imputing the value figures of the items (as mentioned in Para 3.1.1) received free by the households through various social welfare programmes. The value figures shown in tables and statements throughout this chapter are expressed as nominal values, unless otherwise stated and represents expenditure in Indian Rupee as reported by the respondents.

### 3.2.1 AVERAGE MPCE: MAJOR STATES AND ALL-INDIA

---

3.2.1.0 The average estimated MPCE in 2022-23 is observed to be Rs. 3,773 in rural India and Rs. 6,459 in urban India. (Table 3.1). Thus, the per capita expenditure level in the urban areas, in nominal terms, and ignoring rural-urban differences in price levels, has been about 71% more than that in the rural areas.

**Table 3.1: Average MPCE across fractile classes of MPCE, All-India**

<b>Fractile classes of MPCE</b>	<b>Rural</b>		<b>Urban</b>	
	<b>Upper limit (Rs.)</b>	<b>Average MPCE (Rs.)</b>	<b>Upper limit (Rs.)</b>	<b>Average MPCE (Rs.)</b>
<b>(1)</b>	<b>(2)</b>	<b>(3)</b>	<b>(4)</b>	<b>(5)</b>
0-5%	1,638	1,373	2,382	2,001
5-10%	1,912	1,782	2,813	2,607
10-20%	2,289	2,112	3,467	3,157
20-30%	2,612	2,454	4,053	3,762
30-40%	2,927	2,768	4,647	4,348
40-50%	3,268	3,094	5,286	4,963
50-60%	3,657	3,455	6,061	5,662
60-70%	4,138	3,887	7,036	6,524
70-80%	4,819	4,458	8,425	7,673
80-90%	6,043	5,356	11,089	9,582
90-95%	7,411	6,638	14,189	12,399
95-100%	-	10,501	-	20,824
<b>All classes</b>	<b>-</b>	<b>3,773</b>	<b>-</b>	<b>6,459</b>

**Note:** Break-up of MPCE by fractile classes for each State/UT is given in Statement Tables 2R and 2U.

3.2.1.1 The average MPCE (Rs. 10,501) of the top 5% of the population is about 7.6 times of the average MPCE (Rs. 1,373) of bottom 5% of India's rural population. The gap in average MPCE between the bottom 5% and top 5% of the population is more pronounced in the urban areas than the rural areas: with average MPCE at Rs. 20,824 of top 5% of the population about 10.4 times of the average MPCE (Rs. 2,001) of the bottom 5% of the population in urban areas.

3.2.1.2 The average MPCE figures for rural and urban areas of the 18 major states are shown in Table 3.2. It is observed that among the major states, MPCE is the lowest in Chhattisgarh for rural (Rs. 2,466) as well as urban (Rs. 4,483) sectors. It is the highest in Kerala (Rs. 5,924) in rural areas and Telangana (Rs. 8,158) in urban areas.

**Table 3.2: Average MPCE and urban-rural differences in MPCE in 2022-23, major States**

<b>Major State</b>	<b>Average MPCE (Rs.)</b>		<b>Urban-Rural differences (%) in MPCE</b>
	<b>Rural</b>	<b>Urban</b>	
<b>(1)</b>	<b>(2)</b>	<b>(3)</b>	<b>(4)</b>
Andhra Pradesh	4,870	6,782	39
Assam	3,432	6,136	79
Bihar	3,384	4,768	41
Chhattisgarh	2,466	4,483	82
Gujarat	3,798	6,621	74
Haryana	4,859	7,911	63
Jharkhand	2,763	4,931	78
Karnataka	4,397	7,666	74
Kerala	5,924	7,078	19
Madhya Pradesh	3,113	4,987	60
Maharashtra	4,010	6,657	66
Odisha	2,950	5,187	76
Punjab	5,315	6,544	23
Rajasthan	4,263	5,913	39
Tamil Nadu	5,310	7,630	44
Telangana	4,802	8,158	70
Uttar Pradesh	3,191	5,040	58
West Bengal	3,239	5,267	63
<b>All-India</b>	<b>3,773</b>	<b>6,459</b>	<b>71</b>

*Note:* Average MPCE for each State/UT is given in Statement Tables 2R and 2U.

3.2.1.3 A wide variation in urban-rural difference in average MPCE is observed across the 18 major states. It is the lowest in Kerala (about 19%) and highest in Chhattisgarh (around 82%), the state having the lowest average MPCE in both rural and urban areas among the major states.

### 3.2.2 TREND IN LEVEL OF CONSUMPTION IN NOMINAL AND REAL PRICES

---

3.2.2.0 A comparison of the MPCE figures of 2022-23 with that of 2011-12 reveals that over a period of more than 10 years, in nominal prices, it has become more than double in rural as well as in urban India. The growth of MPCE in nominal price in rural and urban India has been 164% and 146%, respectively during this period. The growth in the rural and urban all-India MPCE figures, over the corresponding period, in real prices, has been found to be 40% and 33% respectively. Table 3.3 shows the trend in nominal and real values of MPCE for rural and urban India during the period 1999-'00 to 2022-23.

**Table 3.3: Trend in MPCE since 1999-'00, All-India**

<b>Sector</b>	<b>Average MPCE (Rs.) in</b>				
	<b>1999-'00 NSS (55<sup>th</sup> round)</b>	<b>2004-05 NSS (61<sup>st</sup> round)</b>	<b>2009-10 NSS (66<sup>th</sup> round)</b>	<b>2011-12 NSS (68<sup>th</sup> round)</b>	<b>2022-23</b>
(1)	(2)	(3)	(4)	(5)	(6)
<b>At nominal price</b>					
<b>Rural</b>	486	579	1,054	1,430	3,773
<b>Urban</b>	855	1,105	1,984	2,630	6,459
<b>At real price (2011-12 price)</b>					
<b>Rural</b>	978	1,054	1,239	1,430	2,008
<b>Urban</b>	1,823	1,946	2,358	2,630	3,510

*Note: (i) For the years 1999-'00 & 2004-05, estimates are based on Mixed Reference Period (MRP) and for the years 2009-10, 2011-12 and 2022-23, these are based on Modified MRP (MMRP).*

*MRP: The estimate of MPCE is based on household consumption expenditure on - (i) clothing and bedding, footwear, education, institutional medical care, and durable goods recorded for a reference period of "last 365 days", and (ii) expenditure on all other items recorded for a reference period of "last 30 days".*

*MMRP: The estimate of MPCE is based on household consumption expenditure on edible oil, egg, fish and meat, vegetables, fruits, spices, beverages, refreshments, processed food, pan, tobacco and intoxicants recorded for a reference period of "last 7 days", and for all other items, recorded for the same reference period as in case of Mixed Reference Period (except for milk & milk products for which 7-days reference period has been considered in HCES:2022-23).*

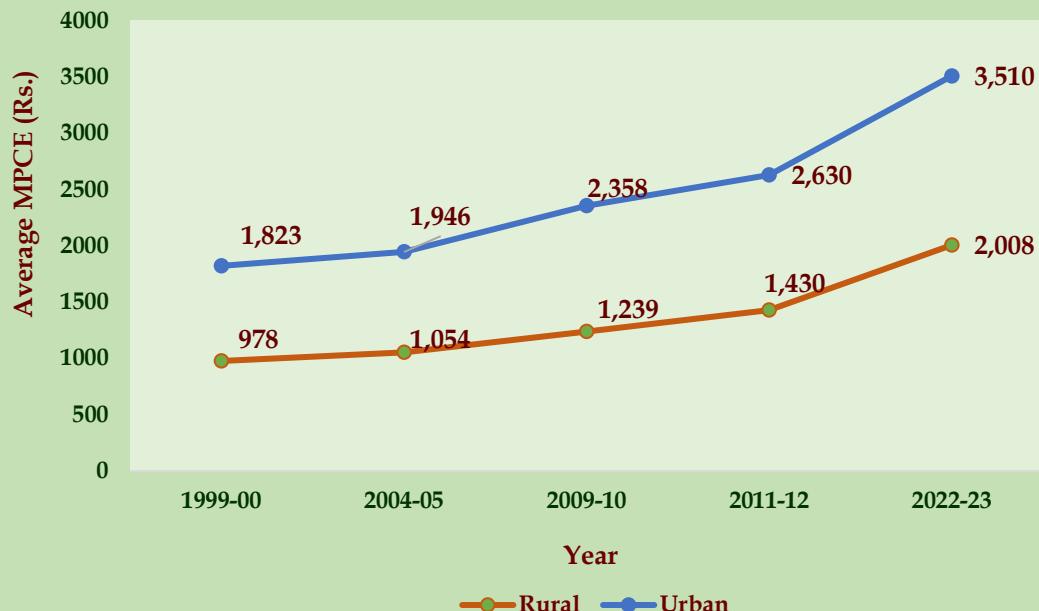

*(ii) For the years 1999-'00, 2004-05 and 2009-10 the rural and urban MPCE estimates have been inflated using CPI(AL) and CPI(IW-General) respectively, to obtain the MPCE values at 2011-12 price. The MPCE estimates of 2022-23 have been deflated using CPI(R) & CPI(U) for rural and urban sectors respectively to obtain the MPCE values at 2011-12 price.*

3.2.2.1 Figures 1 and 2 represent the trend in average MPCE since 1999-'00 at nominal prices and real prices, respectively.

**Figure 1: Trend in average MPCE since 1999-'00 : All-India (at nominal price)**

**Figure 2: Trend in average MPCE since 1999-'00 : All-India (at 2011-12 price)**

### 3.2.3 MEDIAN AND DECILES OF THE MPCE DISTRIBUTION: MAJOR STATES

---

3.2.3.0 Tables 3.4R & 3.4U show the nine deciles, denoted by  $P_{10}$ ,  $P_{20}$ , ...,  $P_{90}$  of distributions of MPCE for rural and urban sectors for the major states in India. The median level of rural MPCE has been about Rs.3,268, i.e., half of the rural population belongs to households with MPCE below this level. In urban India, the median level of MPCE is about Rs. 5,286 indicating that half of the urban population has MPCE below this level. About 62.6% of the rural population of India has MPCE below the rural average of Rs. 3,773 and 64.5% of the urban population has MPCE below the urban average of Rs. 6,459.

**Table 3.4R: Deciles of the distribution of persons by MPCE by major states -Rural**

<b>Major State</b>	<b>Deciles of the distribution of persons by MPCE</b>

\* $P_k$  (for  $k = 10, 20, 30, \dots, 80, 90$ ) is the  $k$ th percentile of the distribution of persons by MPCE, that is, the MPCE level below which  $k\%$  of the population lie.

### 3.2.4 MPCE AND HOUSEHOLD SIZE: ALL-INDIA

---

3.2.4.0 Figure 3 shows MPCE values for 10 different household sizes. A steady decline in MPCE figures is observed with an increase in the size of the household. The MPCE figures for single member households have been, on an average, the highest while it is observed to be the lowest for households with 10 or more members. The same scenario is found to be present in rural as well as in urban areas.

### 3.2.5 SHARES OF VARIOUS FOOD AND NON-FOOD ITEM GROUPS IN TOTAL EXPENDITURE: ALL-INDIA

3.2.5.0 Table 3.5 shows the absolute and percentage break-up of all-India rural and urban MPCE in 2022-23 into 10 broad groups of food items and 11 broad groups of non-food items. A graphical representation of the percentage share of food and non-food items in total MPCE is given in Figure 4. A similar type of break-up of MPCE for the States/UTs is given in Statement Tables 3 and 4.

3.2.5.1 It is observed that in 2022-23, in rural India, food accounted for about 46% of the value of the average rural Indian households' consumption. Among the food items, the contribution of beverages, refreshments and processed food has been the highest (9.62%) followed by milk & milk products (8.33%) and vegetables (5.38%) in rural India. The contribution of cereals and cereal substitutes in the expenditure has been about 4.91%. Among non-food items, the maximum contribution has been of conveyance (7.55%) followed by medical (7.13%), durable goods (6.89%) and fuel and

light (6.66%). Items like clothing, bedding & footwear and miscellaneous goods, entertainment each has a share of about 6% in MPCE.

3.2.5.2 In urban India, the contribution of food in MPCE in 2022-23 has been about 39% and similar to rural India, the contribution of beverages, refreshments and processed food has been the highest (10.64%) in this expenditure followed by milk & milk products (7.22%) and fruits and vegetables, each having a share of 3.8%.

3.2.5.3 The share of non-food items in MPCE in urban India has been around 61%, about 7% more than that of rural India. Conveyance with 8.59% contribution has the largest share in non-food expenditure in urban India while other major components of non-food expenditure in urban India are durable goods (7.17%), miscellaneous goods & entertainment and rent, each with a share of about 6.56%.

\*includes gram   #includes purchased cooked meals   \$excludes tailoring charges

&includes tailoring charges

3.2.5.4 While interpreting observations from Table 3.5 above, the following needs to be considered:

3.2.5.5 All averages are computed taking the entire estimated population in the denominator. This fact may be borne in mind, specially, for those items showing very low average expenditure, like 'rent' and 'taxes and cesses' in rural India. The actual number of consuming persons in the population is not considered here for any of the item groups. For some item groups such as cereals, consuming persons would mean nearly the entire population; for other items, such as tobacco, it would obviously be much smaller.

3.2.5.6 "Expenditure" on food includes the value of self-consumed home produce, calculated at ex farm prices. It also includes the value of food collected free, for example, from forests, imputed at prevailing local retail prices. "Expenditure" on fuel, likewise, includes the value of home-grown firewood, calculated at ex farm prices, and the value of firewood and other fuel collected free, imputed at local retail prices.

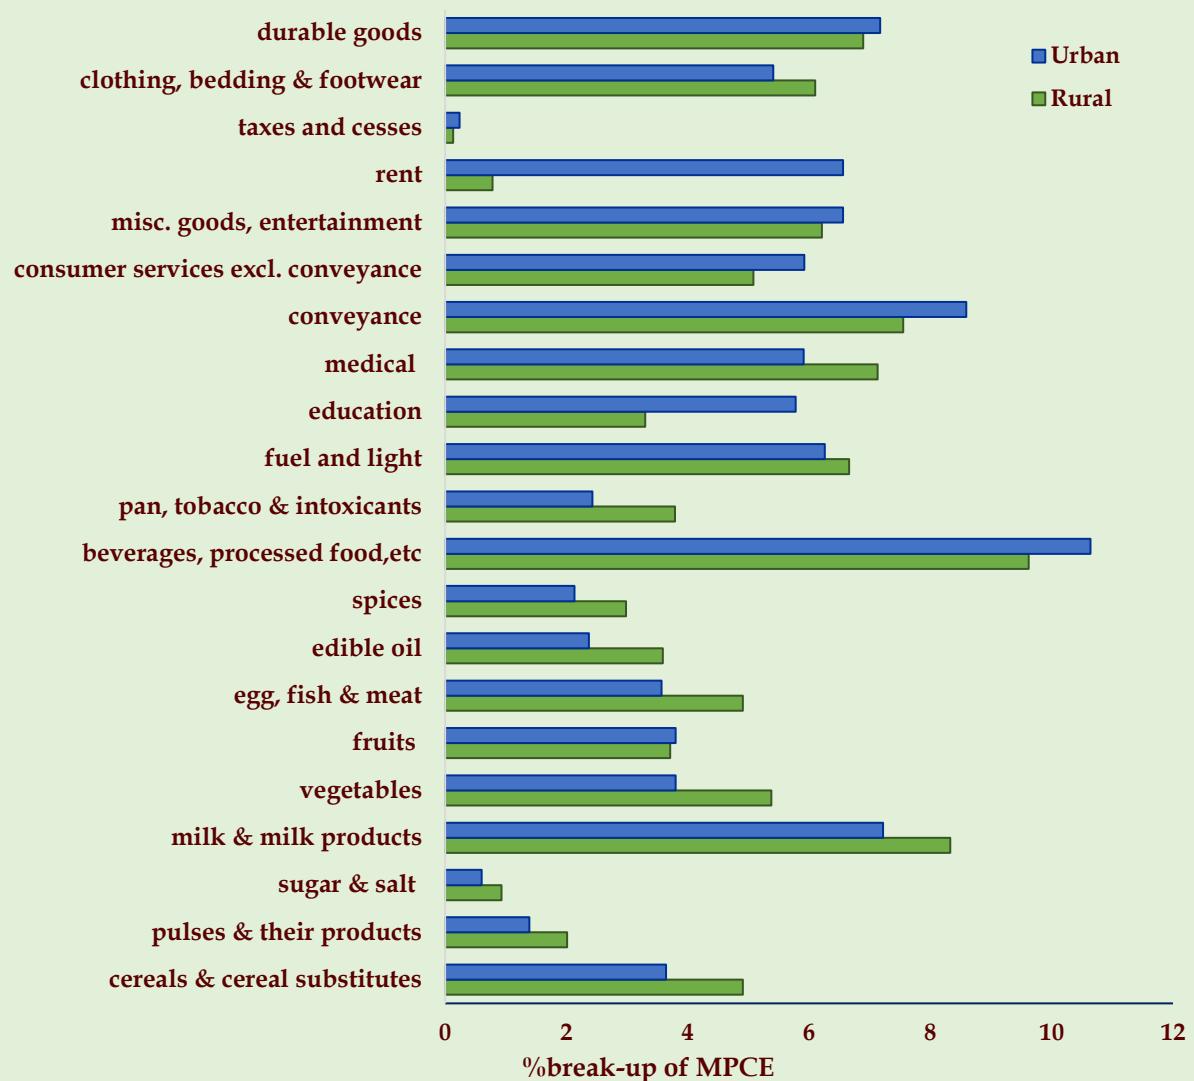

3.2.5.7 "Processed food" refers to purchased food items such as jam, pickles, etc., the quantities and values of the individual ingredients of which are not known well enough to be reported against the detailed items listed in the consumer expenditure schedule. All food processed at home is accounted against the ingredients. For

example, a sweet prepared at home and consumed is accounted in the household's (and the concerned State/UTs) consumption of cereals, sugar, milk, etc., but not in its consumption of processed food. Cooked meals and snacks purchased from outside are also considered in this category.

3.2.5.8 Spending on tailor-made clothing does not include tailoring charges, which are included in "consumer services".

3.2.5.9 Figure 4 below shows the percentage share of broad item groups in total MPCE for rural and urban sector.

**Figure 4: Percentage share of MPCE by item groups in 2022-23**

### 3.2.6 INTER-STATE VARIATION IN FOOD AND CEREAL CONSUMPTION: MAJOR STATES

3.2.6.0 Table 3.6 shows the percentage share of cereals and food as a whole in total expenditure for the major states. The share of food in total consumption expenditure of rural households varies from 39% (in Kerala) to 54% (in Bihar and Assam). For urban sector, the share of food in consumption expenditure varies from 35% (in Telangana) to 47 % (in Assam and Bihar).

3.2.6.1 The share of cereals in total expenditure in rural India varies from 3% (in Haryana, Kerala and Punjab) to 7% (in Bihar, Jharkhand and West Bengal). In urban India, the share varies from 3% (in Haryana, Karnataka, Kerala, Punjab and Tamil Nadu) to 6% (in Bihar and Jharkhand).

**Table 3.6: Percentage share of cereals and food in total consumption expenditure in 2022-23, major states**

Major states	Rural		Urban	
	% share in total expenditure			
	cereals	food	cereals	food

### **3.2.7 TREND IN PER CAPITA QUANTITY CONSUMPTION OF CEREALS: ALL-INDIA**

---

3.2.7.0 Table 3.7 below shows the comparison of per capita quantity consumption of cereals during last 30 days from the past four NSS surveys and HCES: 2022-23. A gradual decline in per capita quantity consumption of cereals in rural as well as urban areas has been observed during the period 1999-'00 to 2022-23.

**Table 3.7: Trend in per capita quantity consumption of cereals since 1999-'00**

### **3.2.9 INTER-STATE VARIATION IN EXPENDITURE FOR DIFFERENT FOOD ITEMS: MAJOR STATES**

3.2.9.0 Tables 3.9R and 3.9U below elucidate inter-state variation in food consumption pattern, with regard to contribution of cereals, processed food & beverages, milk & milk products, egg, fish & meat, vegetables and fruits to total food MPCE, separately for rural and urban sectors.

3.2.9.1 In rural sector, the share of the item category 'beverages, processed food etc.' in total food consumption has been maximum for almost all the major states except for Gujarat, Haryana, Madhya Pradesh, Punjab, Rajasthan and Uttar Pradesh where

maximum share has been for 'milk and milk products' and for Kerala with the maximum share in 'egg, fish & meat'. In urban sector also, the share of the item group 'beverages, processed food etc.' has been maximum in total food expenditure for almost all major states except for Haryana, Punjab, Rajasthan and Uttar Pradesh where maximum share of consumption has been for milk & milk products.

**Table 3.9R: Percentage share of selected food item groups in total food expenditure in 2022-23, major states - Rural**

Major state	cereal	milk and milk products	vege-tables	fruits	egg, fish & meat	beverages, processed food, etc.	others	total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)

### 3.2.10 INTER-STATE VARIATION IN EXPENDITURE FOR DIFFERENT NON-FOOD ITEMS: MAJOR STATES

3.2.10.0 Tables 3.10R and 3.10U show inter-state variation in non-food consumption pattern, to the extent reflected in percentage share expenditure in total non-food MPCE with regard to monthly consumption expenditure on clothing, bedding & footwear, conveyance, durable goods, education, fuel & light, medical and miscellaneous goods, separately for rural and urban sectors. For both rural and urban areas, conveyance has been found to be a major contributor to the total non-food expenditure of the households for almost all the major states and it is closely followed by durable goods and miscellaneous goods, entertainment.

**Table 3.10R: Percentage share of expenditure of non-food items in total non-food expenditure in 2022-23, major states - Rural**

### **3.2.11 TREND IN PATTERN OF CONSUMPTION OF BROAD ITEM GROUPS: ALL-INDIA**

3.2.11.0 Tables 3.11R and 3.11U show changes in percentage composition of MPCE in terms of broad item groups as shown by the past five NSS surveys beginning with 1999-00 separately, for rural and urban sectors. The share of food is seen to have shrunk from 59.4% in 1999-00 to 46.4% in 2022-23 in the rural areas and from 48.1% to 39.2% in the urban areas during the corresponding period.

3.2.11.1 Although, there has been a decline in the share of food items like cereals, pulses & pulse products and sugar & salt over the period, the item category of “processed food, beverages, etc.” has shown a remarkable growth in contribution to

total MPCE in 2022-23 when compared with the earlier periods. The decline in the share has been the steepest for cereals which has come down to 4.9% in 2022-23 from 22.2% in 1999-'00 in rural India and for urban India, the corresponding share has declined to 3.6% in 2022-23 from 12.4% in 1999-'00.

### 3.2.12 AVERAGE MPCE ACROSS SOCIAL GROUPS: MAJOR STATES

---

3.2.12.0 Table 3.12 presents state-wise average rural and urban MPCE across different social groups for major states in India. The variation in MPCE among the social groups is the highest in Kerala and it is the least in Assam among the major state for both the sectors. Monthly average value of consumption per person across different social groups for each State/UTs and All-India is given in Statement Table 8.

### 3.2.13 AVERAGE MPCE ACROSS HOUSEHOLD TYPES: MAJOR STATES

---

3.2.13.0 Tables 3.13R and 3.13U present the average MPCE (rural and urban) by household type for each major state. It is observed that the households belonging to

the 'others' category has the highest average MPCE (Rs. 4,684), followed by households with 'regular wage/salary earning in non-agriculture' (Rs. 4,533) in rural India. The rural households belonging to the category 'casual labour in agriculture' has the lowest MPCE (Rs. 3,273). In urban areas, the households of 'others' category has the highest average MPCE (Rs. 8,619) while it is the lowest for households of 'casual labour' category (Rs. 4,379). Monthly average value of consumption per person across different household type for State/UTs and All-India is given in Statement table 7.

**Table 3.13R: Average MPCE (Rs.) by household type in 2022-23, major states -Rural**

Major state	self-employment in agriculture	self-employment in non-agriculture	regular wage/salary earning in agriculture	regular wage/salary earning in non-agriculture	casual labour in agriculture	casual labour in non-agriculture	others	all

### 3.2.14 INEQUALITY IN DISTRIBUTION OF MPCE: ALL-INDIA

3.2.14.0 Table 3.14 gives the share of each all-India rural and urban fractile class in total consumption expenditure. A decline in the percentage share of consumption expenditure has been observed for the top two fractile classes of MPCE for rural as well as urban areas in 2022-23 from the level of 2011-12.

**Table 3.14: Percentage share of consumption in different fractile classes of MPCE in 2011-12 and 2022-23: All- India**

Fractile clas- ses of MPCE	% share of consumption			
	Rural		Urban	
	2011-12	2022-23	2011-12	2022-23
(1)	(2)	(3)	(4)	(5)
0-5%	1.8	1.8	1.3	1.5
5-10%	2.3	2.4	1.7	2.0
10-20%	5.5	5.6	4.3	4.9
20-30%	6.3	6.5	5.2	5.8
30-40%	7.1	7.3	6.2	6.7
40-50%	7.9	8.2	7.2	7.7
50-60%	8.9	9.2	8.3	8.8
60-70%	10.0	10.3	9.7	10.1
70-80%	11.5	11.8	11.6	11.9
80-90%	14.0	14.2	14.8	14.8
90-95%	8.9	8.8	10.2	9.6
95-100%	15.7	13.9	19.5	16.1

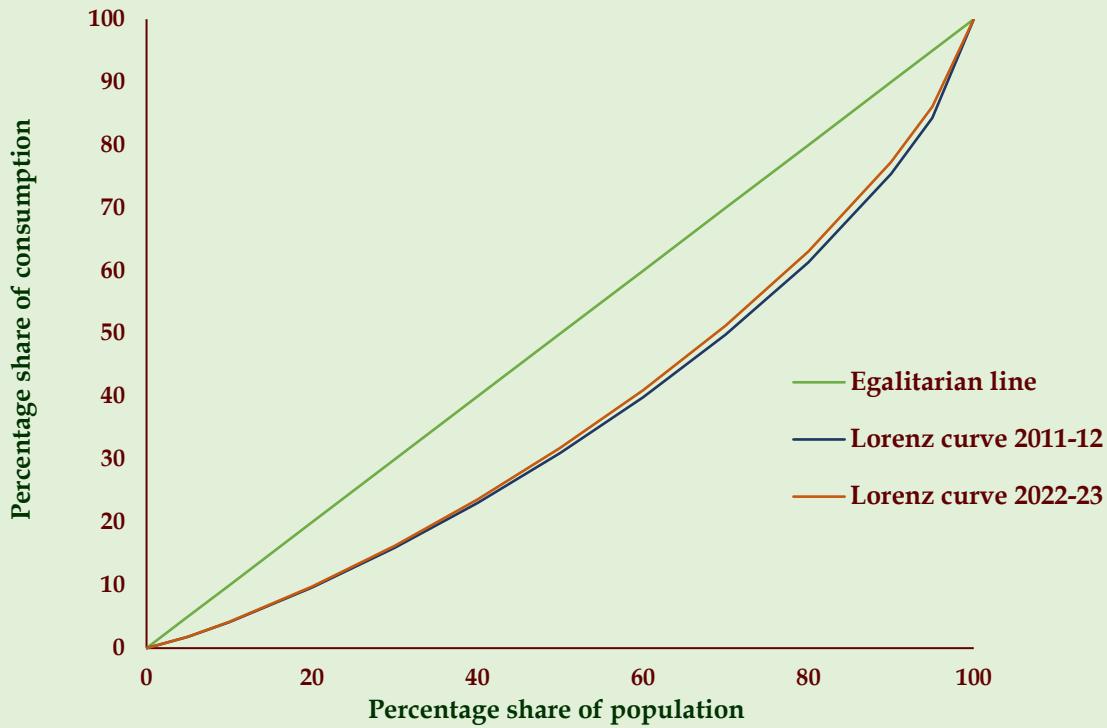

3.2.14.1 Comparison of the Gini coefficient from HCES: 2022-23 with those from 2011-12 shows a decline, from 0.283 to 0.266 for the rural sector and from 0.363 to 0.314 for the urban sector of the country (Table 3.15). The values of the Gini coefficient for major states for rural and urban areas are given in Table 3.16.

**Table 3.15: Gini coefficient of total consumption expenditure in 2011-12 and 2022-23, All-India**

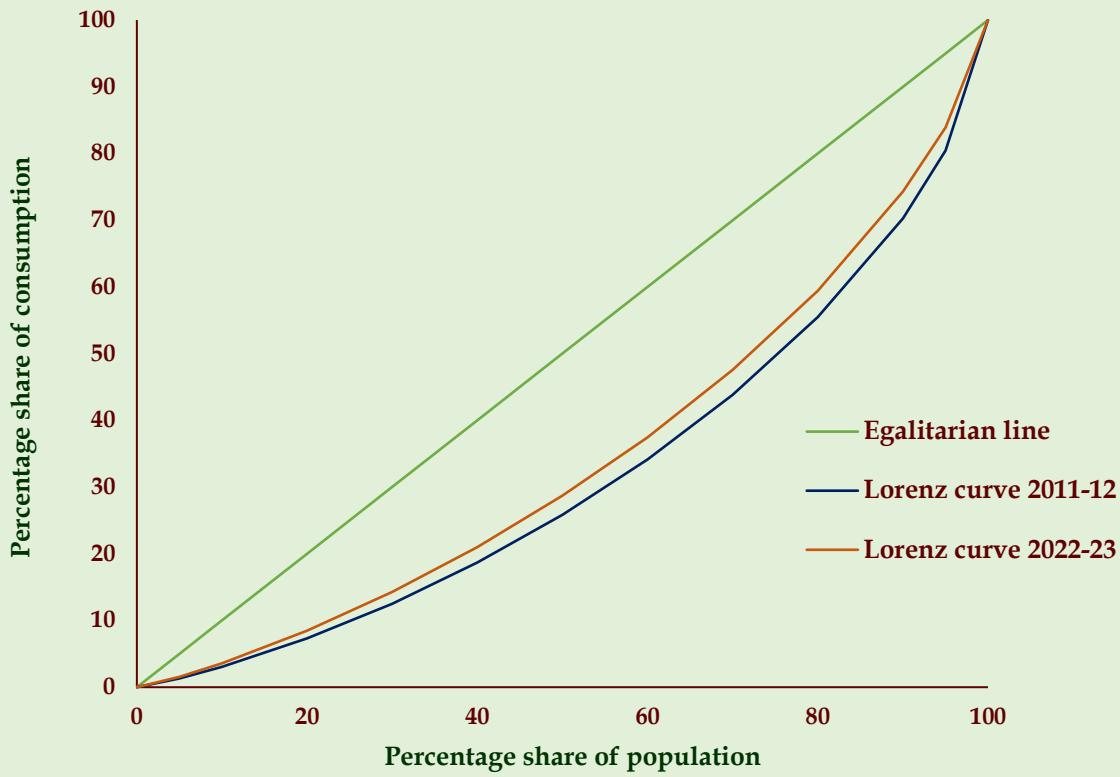

Sector	Gini coefficient of consumption expenditure	
	2011-12	2022-23
(1)	(2)	(3)
Rural	0.283	0.266
Urban	0.363	0.314

3.2.14.2 A comparison of the Lorenz curves for total consumption expenditure for the years 2011-12 and 2022-23 are shown in Figures 6R and 6U separately, for rural and urban India.

**Figure 6R: Lorenz curve for total consumption expenditure  
Rural India**

**Figure 6U: Lorenz curve for total consumption expenditure  
Urban India**

**Table 3.16: Gini coefficient of total consumption expenditure in 2022-23, major states**

<b>Major state</b>	<b>Rural</b>	<b>Urban</b>
(1)	(2)	(3)
Andhra Pradesh	0.243	0.283
Assam	0.207	0.285
Bihar	0.219	0.278
Chhattisgarh	0.266	0.313
Gujarat	0.226	0.281
Haryana	0.234	0.332
Jharkhand	0.255	0.296
Karnataka	0.225	0.307
Kerala	0.286	0.337

### 3.2.15 EFFICACY OF THE ESTIMATES OF MPCE

3.2.15.0 The estimates of relative standard errors (RSE) and 95% confidence intervals of average MPCE for major states are presented in Table 3.17. The RSE figures for all states and sectors are given in Appendix C.

**Table 3.17: Relative Standard Errors (RSE) and 95% Confidence Intervals (CI) of Average MPCE, major States**

Major state	RSE (%) of Average MPCE		95% Confidence Intervals			
			Rural		Urban	
	Rural	Urban	Lower limit	Upper limit	Lower limit	Upper limit
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Andhra Pradesh	1.38	2.55	4,738	5,002	6,443	7,121
Assam	1.32	2.58	3,343	3,521	5,825	6,447
Bihar	0.92	2.65	3,323	3,445	4,520	5,016
Chhattisgarh	2.62	3.44	2,339	2,593	4,181	4,785
Gujarat	1.35	2.30	3,697	3,899	6,323	6,919
Haryana	2.06	4.19	4,662	5,056	7,261	8,561
Jharkhand	1.89	2.74	2,660	2,866	4,667	5,195
Karnataka	1.37	2.18	4,279	4,515	7,338	7,994
Kerala	1.82	2.48	5,712	6,136	6,734	7,422
Madhya Pradesh	1.20	2.47	3,040	3,186	4,746	5,228
Maharashtra	2.38	1.85	3,823	4,197	6,416	6,898
Odisha	1.35	3.50	2,872	3,028	4,832	5,542
Punjab	1.50	2.34	5,159	5,471	6,244	6,844
Rajasthan	4.29	2.37	3,904	4,622	5,638	6,188
Tamil Nadu	1.54	2.34	5,150	5,470	7,279	7,981
Telangana	1.60	3.23	4,651	4,953	7,641	8,675
Uttar Pradesh	0.72	1.52	3,146	3,236	4,890	5,190
West Bengal	1.16	1.99	3,165	3,313	5,062	5,472
All-India	0.55	0.64	3,733	3,813	6,377	6,541

### **3.3 SECTION II: ESTIMATES OF MPCE - WITH IMPUTATION**

---

3.3.0 The estimates of average MPCE presented here have been generated considering the imputed value figures of the items received free by the households through various social welfare programmes (as mentioned in para 3.1.1), in addition to the imputed values of consumption out of home produce, free collection, gifts etc. as explained in para 2.2.2 of Chapter 2. With a view to reduce redundancy and lessen burden of the readers, this section is not made an identical replica of Section I in terms of composition of sub-sections and contents thereof. Instead, in view of the fact that imputation is restricted to few selected items only, changes in the estimates of average MPCE figures by various cross-classifications with regard to different domains are presented in summarized tabular format along with a comparison with the MPCE figures discussed in Section I.

3.3.1 A separate data file containing the modal unit prices used for imputation of the value figures for (i) food items: Rice, Wheat/ Atta, Jowar, Bajra, Maize, Ragi, Barley, Small Millets, Pulses, Gram, Salt, Sugar, Edible Oil and (ii) non-food items: Laptop/PC, Tablet, Mobile Handset, Bicycle, Motor Cycle/Scooty, Clothing (School uniform), Footwear (School shoe etc.) received free of cost by the households is being released with the unit level data. This would allow the users to generate estimates of MPCE and its various components with imputation at disaggregated levels.

#### **3.3.2 COMPARISON OF TWO-SETS OF MPCE FIGURES: MAJOR STATES**

---

3.3.2.0 A comparison of the average MPCE figures for major states using the conventional NSS approach as well as utilizing the imputed values of the items as mentioned in para 3.1.1 is given in Table 3.18. As a consequence of imputation, there is an increase in the MPCE figures with imputation and this has also resulted in

marginal decline in urban-rural differences in MPCE across all major states in rural as well as urban areas.

**Table 3.18: Average MPCE and urban-rural differences in MPCE in 2022-23, major States**

<b>Major state</b>	<b>Average MPCE (Rs.)</b>			<b>Average MPCE (Rs.) with imputation</b>		
	<b>Rural</b>	<b>Urban</b>	<b>urban-rural differences (%) in MPCE</b>	<b>Rural</b>	<b>Urban</b>	<b>urban-rural differences (%) in MPCE</b>
<b>(1)</b>	<b>(2)</b>	<b>(3)</b>	<b>(4)</b>	<b>(5)</b>	<b>(6)</b>	<b>(7)</b>
Andhra Pradesh	4,870	6,782	39	4,996	6,877	38
Assam	3,432	6,136	79	3,546	6,210	75
Bihar	3,384	4,768	41	3,454	4,819	40
Chhattisgarh	2,466	4,483	82	2,575	4,557	77
Gujarat	3,798	6,621	74	3,820	6,630	74
Haryana	4,859	7,911	63	4,912	7,948	62
Jharkhand	2,763	4,931	78	2,796	4,946	77
Karnataka	4,397	7,666	74	4,578	7,781	70
Kerala	5,924	7,078	19	5,960	7,102	19
Madhya Pradesh	3,113	4,987	60	3,158	5,011	59
Maharashtra	4,010	6,657	66	4,076	6,683	64
Odisha	2,950	5,187	76	2,996	5,223	74
Punjab	5,315	6,544	23	5,363	6,577	23
Rajasthan	4,263	5,913	39	4,348	5,970	37
Tamil Nadu	5,310	7,630	44	5,457	7,742	42
Telangana	4,802	8,158	70	4,959	8,251	66
Uttar Pradesh	3,191	5,040	58	3,277	5,104	56
West Bengal	3,239	5,267	63	3,407	5,426	59
<b>All-India</b>	<b>3,773</b>	<b>6,459</b>	<b>71</b>	<b>3,860</b>	<b>6,521</b>	<b>69</b>

*Note:* (i) 'Average MPCE' represents the MPCE figures generated following the usual NSS practice of imputation of the value figures at the time of collection of data in the field for consumption out of home-grown/home-produced stock and; gifts, free collection and goods received in exchange of goods and services, etc.

(ii) 'Average MPCE with imputation' represents the MPCE figures generated utilizing the imputed value figures of the items as mentioned in para 3.1.1 in conjunction with adoption of usual NSS practice of imputation of value figures for the items by the field personnel as explained earlier.

### 3.3.3 TREND IN LEVEL OF CONSUMPTION IN NOMINAL AND REAL PRICES: ALL-INDIA

3.3.3.0 Table 3.19 shows the trend in nominal and real values of imputed MPCE for rural and urban India during the period 1999-'00 to 2022-23.

**Table 3.19: Trend in MPCE since 1999-'00, All-India**

Sector	Average MPCE (Rs.) in					2022-23
	1999-'00 NSS (55 <sup>th</sup> round)	2004-05 NSS (61st round)	2009-10 NSS (66 <sup>th</sup> round)	2011-12 NSS (68 <sup>th</sup> round)		
	(1)	(2)	(3)	(4)	(5)	(6)
<b>At nominal price</b>						
<b>Rural</b>	486	579	1,054	1,430	3,773	3,860
<b>Urban</b>	855	1,105	1,984	2,630	6,459	6,521
<b>At real price (2011-12 price)</b>						
<b>Rural</b>	978	1,054	1,239	1,430	2,008	2,054
<b>Urban</b>	1,823	1,946	2,358	2,630	3,510	3,543

*Note: (i) For the years 1999-'00 & 2004-05, estimates are based on Mixed Reference Period (MRP) and for the years 2009-10, 2011-12 and 2022-23, these are based on Modified MRP (MMRP).*

**MRP:** The estimate of MPCE is based on household consumption expenditure on – (i) clothing and bedding, footwear, education, institutional medical care, and durable goods recorded for a reference period of “last 365 days”, and (ii) expenditure on all other items recorded for a reference period of “last 30 days”.

**MMRP:** The estimate of MPCE is based on household consumption expenditure on edible oil, egg, fish and meat, vegetables, fruits, spices, beverages, refreshments, processed food, pan, tobacco and intoxicants recorded for a reference period of “last 7 days”, and for all other items, recorded for the same reference period as in case of Mixed Reference Period (except for milk & milk products for which 7-days reference period has been considered in HCES:2022-23).

(ii) For the years 1999-'00, 2004-05 and 2009-10 the rural and urban MPCE estimates have been inflated using CPI(AL) and CPI(IW-General) respectively, to obtain the MPCE values at 2011-12 price. The MPCE estimates of 2022-23 have been deflated using CPI(R) & CPI(U) for rural and urban sectors respectively to obtain the MPCE values at 2011-12 price.

### 3.3.4 COMPARISON OF SHARES OF VARIOUS FOOD AND NON-FOOD ITEM GROUPS IN TOTAL EXPENDITURE: ALL-INDIA

3.3.4.0 Table 3.20 shows the absolute and percentage break-up of all-India rural and urban average MPCE and average MPCE with imputation for 2022-23 into 10 broad groups of food items and 11 broad groups of non-food items.

**Table 3.20: Absolute and percentage break-up of MPCE by item groups in 2022-23:  
All-India**

<b>Item group</b>	<b>Average MPCE (Rs.)</b>		<b>Average MPCE (Rs.) with imputation</b>		<b>% share in total MPCE</b>		<b>% share in total MPCE with imputation</b>

### A Note for the Users of Unit Level Data of HCES: 2022-23

The objective of the Household Consumption Expenditure Survey (HCES): 2022-23 has been to collect information on consumption of goods and services by the households for generation of indicators for understanding the consumption and expenditure pattern, standard of living and well-being of the households. The main indicator compiled on the basis of the data collected through HCES is the Monthly Per Capita Consumption Expenditure (MPCE) of the household.

Like all other NSS surveys, in this survey too, there has been provision to collect information on household characteristics e.g., social group, religion, household type, etc. along with demographic particulars of household members, namely, age, marital status, highest educational level attained, etc. in Section 3 and Section 4 of the questionnaire HCQ. Information on these items of Sections 3 & 4 have been recorded by the survey enumerators on the basis of reporting by the respondents and no cross-check/validation of these has been done with the relevant documents. The purpose of gathering information on these auxiliary variables has been to generate estimates of the indicators related to the variables of interest by different types cross-classifications and not to generate any estimates like sex ratio, literacy rates, percentage of population by various social groups etc. on the basis of these auxiliary information. Consequently, data related to these auxiliary variables were recorded as reported by the respondent and not verified with any administrative record(s). Hence, the users of the unit level data are advised not to make use of the auxiliary information for estimation of indicators, as such an exercise would result in misleading and inappropriate conclusions.

The survey has also gathered auxiliary information on the following items:

- Online purchase/payment of some selected goods and services,
- Household's usual consumption expenditure in a month,
- Total expenditure incurred on online purchase/payment of food items/consumable & services items during the last 30 days and expenditure incurred on online purchase/payment of durable goods during the last 365 days etc.

The sole purpose of gathering on these items has been to check internal consistency and validation of the data and not to compile estimates/indicators based on this information.

States/UTs have been regarded as the basic stratum in HCES: 2022-23. Thus, any attempt to generate estimates of MPCE below State/UT level may lead to inaccurate/inappropriate figures in the absence of availability of sufficient number of sample observations at district level and users should refrain from generating such estimates.

# *Summary Statement*

---

# ***List of Summary Statement***

Statement no.	Description	Page no.
<b>Statement 1</b>	Average monthly per capita consumption expenditure (MPCE) by State/UT and sector	S1
<b>Statement 2R/2U</b>	Average MPCE over 12 fractile classes of MPCE for State/UT and All-India	S2
<b>Statement 3R/3U</b>	Break-up of monthly per capita consumption expenditure over broad categories of consumption items by State/UT	S4
<b>Statement 4R/4U</b>	Percentage break-up of monthly per capita consumption expenditure over broad categories of consumption items by State/UT	S16
<b>Statement 5R/5U</b>	Monthly average quantity of consumption of different cereals per person for State/UT and All-India	S28
<b>Statement 6R/6U</b>	Monthly average value of consumption of different cereals per person for State/UT and All-India	S30
<b>Statement 7R/7U</b>	Average MPCE (Rs.) across different household types for State/UT and All-India	S32
<b>Statement 8R/8U</b>	Average MPCE (Rs.) across different social groups for State/UT and All-India	S34
<b>Statement 9</b>	Average monthly per capita consumption expenditure and Gini Coefficient for per capita consumption expenditure by State/UT and sector	S36
<b>Summary Statements – With Imputation</b>		
<b>Statement 10R/10U</b>	Break-up of monthly per capita consumption expenditure over broad categories of consumption items by State/UT – With Imputation	S38

## *Appendix A*

---

## *Detailed Tables*

---

# *List of Detailed Tables (hyperlinked with the corresponding excel tables)*

Table no.	Description
<b>Table A1</b>	Number of FSUs surveyed and number of households surveyed
<b>Table A2</b>	Estimated number of households and persons by gender and average MPCE for each fractile class of MPCE
<b>Table A3</b>	Percentage distribution of households by size for each fractile class of MPCE
<b>Table A4</b>	Quantity (kg.) of consumption of cereals and pulses per person for a period of 30 days for each fractile class of MPCE
<b>Table A5</b>	Value (Rs.) of consumption of cereals and pulses per person for a period of 30 days for each fractile class of MPCE
<b>Table A6</b>	Value of consumption (Rs.) of broad groups of food and non-food items per person for a period of 30 days for each fractile class of MPCE
<b>Table A7</b>	Percentage distribution of households over different fractile classes for each State/UT
<b>Table A8R/8U</b>	Percentage distribution of persons by fractile class of MPCE and average value of MPCE for different household types
<b>Table A9</b>	Percentage distribution of persons by fractile class of MPCE and average value of MPCE for different social groups
<b>Table A10S</b>	Monthly per capita quantity and value of consumption at detailed item level for all items of consumption by State/UT and All-India
<b>Table A10F</b>	Monthly per capita quantity and value of consumption at detailed item level for all items of consumption over 12 fractile classes of MPCE : All-India
<b>Table A10SW</b>	Monthly per capita quantity and value of consumption at detailed item level for all items of consumption by State/UT and All-India-With Imputation

## *Appendix B*

---

### *Survey Methodology & Estimation Procedure*

---

# *Survey Methodology & Estimation Procedure*

## **2.1 INTRODUCTION**

2.1.0 The latest survey on household consumption expenditure (previously known as household consumer expenditure survey) was conducted during the period August 2022 to July 2023 in which information was collected from each sampled household in three questionnaires, namely, Questionnaire: FDQ (Food Items), Questionnaire: CSQ (Consumables & Services) and Questionnaire: DGQ (Durable Items) in three separate monthly visits in a quarter. Apart from these, another questionnaire, namely, Questionnaire: HCQ was canvassed to collect information on household characteristics.

## **2.2 SAMPLING DESIGN**

2.2.0 In HCES: 2022-23, a multi-stage stratified sampling design was used where villages/urban blocks or sub-units of these were regarded as the First Stage Units (FSU) and the households were the Ultimate Stage Units (USU). Both the FSUs and USUs were selected with Simple Random Sampling Without Replacement (SRSWOR). 18 sample households were canvassed within an FSU.

### **2.2.1 CONCEPT OF PANEL**

2.2.1.0 The survey period of HCES: 2022-23 was divided into 10 panels, each consisting of three months. The compositions of the panels were as below:

Panel number	Time period	Panel number	Time period
Panel 1	August - October 2022	Panel 6	January - March 2023
Panel 2	September – November 2022	Panel 7	February - April 2023
Panel 3	October - December 2022	Panel 8	March - May 2023
Panel 4	November 2022- January 2023	Panel 9	April - June 2023
Panel 5	December 2022- February 2023	Panel 10	May - July 2023

2.2.1.1 In each of these panels, an equal number of FSUs were allotted for survey to ensure uniform spread of the sample over the entire survey period. Because of arduous field conditions, panel restriction was not strictly enforced in the Andaman and Nicobar Islands, Lakshadweep, Ladakh and rural areas of Arunachal Pradesh and Nagaland.

2.2.1.2 In the first month of any panel, Questionnaire: HCQ along with any one of the questionnaires, i.e., FDQ/CSQ/DGQ were canvassed in the selected households. During the second month of the panel, any one from the remaining two questionnaires was canvassed and in the last month, the last questionnaire was canvassed. The sequence of the questionnaires to be canvassed in each month of a panel for a particular FSU was decided randomly to eliminate bias that may arise due to the adoption of a particular sequencing for canvassing. Thus, all six possible sequences, i.e., [(Q1, Q2, Q3), (Q1, Q3, Q2), (Q2, Q1, Q3), (Q2, Q3, Q1), (Q3, Q1, Q2) and (Q3, Q2, Q1)], where Q1 refers to FDQ, Q2 refers to CSQ and Q3 refers to DGQ, were canvassed at random in the sample households.

## **2.2.2 CHOICE OF FIRST STAGE UNIT / SAMPLING FRAME FOR FIRST STAGE UNIT**

2.2.2.0 The sampling frame for urban sector is the list of Urban Frame Survey (UFS) blocks as per latest Urban Frame Survey and for rural sector, it is the list of villages as per Census 2011 updated by removing those villages which are urbanized and included in latest UFS (till the time of sample selection). Sometimes, with a view to ensure uniformity in the size of FSUs and operational convenience, large villages/UFS blocks are notionally divided into smaller units of more or less equal size, known as sub-units depending on a pre-defined criteria based on population in the village or number of households in the UFS block. The sector-specific criteria for sub-unit formation are as below:

### **Rural Sector**

- (i) The number of SUs to be formed in the villages (with Census 2011 population of 1000 or more and except some States/UTs) are decided based on projected present population of the village. The criteria are given below:

Projected Population of the village	Number of SUs to be formed
less than 1200	1
1200 to 2399	2
2400 to 3599	3
...	...

(ii) For rural areas of Himachal Pradesh, Sikkim, Andaman & Nicobar Islands, Ladakh, Parts of Uttarakhand (except four districts Dehradun, Nainital, Haridwar and Udham Singh Nagar), Jammu and Kashmir (seven districts Poonch, Rajouri, Udhampur, Reasi, Doda, Kishtwar, Ramban) and Idukki district of Kerala; SU is formed in a village if population as per Census 2011 is more than or equals to 500. The criteria for the number of SU to be formed are as below:

Projected Population of the village	Number of SUs to be formed
less than 600	1
600 to 1199	2
1200 to 1799	3
...	...

### Urban Sector:

(i) SUs are formed in those UFS blocks having more than or equal to 250 households. The number of SUs to be formed within the UFS blocks is decided by the following criteria:

Number of Households in UFS Block	Number of SUs to be formed
less than 250	1
250 to 499	2
500 to 749	3
...	...

Thus, the list of Villages / UFS Blocks / Sub-Units (for those villages or UFS blocks where sub-units are formed within) together formed the sampling frame for First Stage Unit selection.

### 2.2.3 STRATIFICATION OF FSUS

2.2.3.0 A State/UT is considered as a basic geographical unit for stratum formation in both the sectors for HCES:2022-23. The sector-specific stratification criteria are given below:

### Rural Sector:

- (i) A **Special Stratum** comprising of all the uninhabited villages as per Census 2011 is formed at All-India level.
- (ii) From the remaining villages, two more strata are formed in each State/UT:
  - (a) Stratum 1: Comprising of the villages within a distance of 5 Kms from the district headquarter or from a city/town with more than 5 lakh population. This stratum is not formed if there are less than 50 such villages in the State/UT.
  - (b) Stratum 2: Rest of the villages.

**Urban Sector:** UFS blocks within each State/UT are divided into strata based on two criteria *i.e.*, Population as per Census 2011 and ‘Affluence’ status as indicated in UFS frame. The stratum compositions are as follows:

Strata Number	Strata Composition
Stratum 11:	‘affluent’ UFS blocks of all towns with population less than 50,000
Stratum 12:	remaining UFS blocks of all towns with population less than 50,000
Stratum 21:	‘affluent’ UFS blocks of all towns with population 50,000 or more but less than 3 lakhs
Stratum 22:	remaining UFS blocks of all towns with population 50,000 or more but less than 3 lakhs
Stratum 31:	‘affluent’ UFS blocks of all towns with population 3 lakhs or more but less than 10 lakhs
Stratum 32:	remaining UFS blocks of all towns with population 3 lakhs or more but less than 10 lakhs
Stratum 41, 42, 43...	Separate stratum for each of the Million plus towns, Odd and even numbers are given for affluent and non-affluent blocks respectively

### 2.2.4 SUB-STRATIFICATION OF FSUS

2.2.4.0 In the **rural sector**, three groups of villages are formed within each stratum, except special rural stratum at all-India level based on the following criteria:

Group	Population of the village (as per Census 2011)
1	less than 250
2	250 to 499
3	$\geq 500$

2.2.4.1 Further, the sample size for a particular rural stratum is distributed among these 3 groups in proportion to population and if the group-wise allocation is more than 20, 2 or more sub-strata are formed in each group. If the number of FSUs in a particular group is very small, no sub-stratum is formed.

2.2.4.2 In the **urban sector**, if the sample size allocated for an urban stratum is more than 20, 2 or more sub-strata are formed based on the number of FSUs within that stratum.

## 2.2.5 SAMPLE SIZE

2.2.5.0 8,723 FSUs in the rural areas and 6,115 in the urban areas have been surveyed in HCES:2022-23. The total sample size of 15016 FSUs has been allocated to State/UTs in proportion to Census 2011 population, subject to a minimum allocation of 40 FSUs.

## 2.2.6 SELECTION OF FSUS WITHIN A STRATUM/SUB-STRATUM

2.2.6.0 The required number of FSUs from each of the sub-strata is selected by SRSWOR scheme. The selected sample is divided into 10 Panels with 2 dependent sub-samples within each Panel. Three sequences of questionnaires are canvassed in the FSUs belonging to sub-sample 1 and remaining three sequences are canvassed in FSUs sub-sample 2.

## 2.2.7 FORMATION OF SUB-DIVISION

2.2.7.0 It has been experienced that in some of the selected FSUs, the actual present population is significantly higher than the projected population/Census population that causes operational inconvenience for listing of all the households. In such a situation, the selected FSU is notionally sub-divided into several smaller units, called Sub-division. The criteria for determining the number of Sub-divisions to be formed in the selected rural (except areas mentioned in Point ii Para 1.2.2) /urban FSU is given below.

<b>Approx. present population of the selected SU</b>	<b>Number of Sub-divisions to be formed</b>
less than 1500	1
1500 to 2399	2
2400 to 3599	3
3600 to 4799	4
...	...

2.2.7.1 The criteria for determining the number of Sub-divisions in rural areas mentioned in Point (ii) of Para 1.2.2 is as below:

<b>Approx. present population of the selected SU</b>	<b>Number of Sub-divisions to be formed</b>
less than 750	1
750 to 1199	2
1200 to 1799	3
1800 to 2399	4
...	...

Only one Sub-division is selected randomly after forming the required number of Sub-divisions. Further, listing and selection of households are done in the selected Sub-division unit only.

## 2.2.8 FORMATION OF SECOND STAGE STRATA (SSS)

2.2.8.0 In order to ensure proper representation of households of different economic categories in the sample, all the households of a selected FSU are classified into three second stage stratum (SSS) with the following criteria:

<b>SSS</b>	<b>Rural</b>	<b>Urban</b>
SSS 1	Households with land possessed $> X$ , where $X$ is such that 5% of the households had land possessed more than $X$ as per NSS 77 <sup>th</sup> round SAS survey. This was determined at State/UT level	Households owned one or more four-wheeler cars for non-commercial use as on date of listing whose combined purchase price was more than Rupees 10 lakhs
SSS 2	Households with land possessed $> Y$ and less than or equal to $X$ , where $Y$ is such that 20% of the households had land possessed more than $Y$ as per NSS 77 <sup>th</sup>	Households owned one or more four-wheeler cars for non-commercial use as on date of listing

SSS	Rural	Urban
	round SAS survey. This was determined at State/UT level	whose combined purchase price was less than or equal to Rupees 10 lakhs
SSS 3	Remaining households	Remaining households

A total of 18 households are surveyed from each of the selected FSUs. Allocation of the sample households among the three SSS is done in proportion to the number of households listed in the respective SSS.

## 2.2.9 SELECTION OF HOUSEHOLDS

2.2.9.0 The sample households from each SSS are selected by the SRSWOR scheme.

### 3. ESTIMATION PROCEDURE

#### 3.1 NOTATIONS:

s	Subscript for s <sup>th</sup> stratum
t	Subscript for t <sup>th</sup> sub-stratum
r	Panel number [ r= 1(1)10]
m	Subscript for sub sample
i	Subscript for i <sup>th</sup> FSU [SU/ village /panchayat ward/ block]
j	Subscript for j <sup>th</sup> second stage stratum in an FSU
k	Subscript for k <sup>th</sup> sample household under a particular second stage strata within an FSU/sub-division
D <sub>1</sub>	Total number of sub-divisions formed in the sample FSU. D <sub>1</sub> = 1, if no Sub-division is formed in the SU
N	Total number of sub-unit (FSU) in any rural/urban sub-stratum
n	Number of sample FSUs surveyed including ‘uninhabited’ and ‘zero cases’ but excluding casualty for a particular sub-stratum
H	Total number of households listed in a second-stage stratum of an FSU
h	Number of households surveyed in a second-stage stratum of an FSU
x, y	Observed value of characteristics x, y under estimation
X̂ , Ŷ	Estimate of population total X, Y for the characteristics x, y

Let,  $y_{stijkrm}$  be the observed value of the characteristic y for the k<sup>th</sup> household of the j<sup>th</sup> second stage stratum of the i<sup>th</sup> FSU of r<sup>th</sup> panel and m<sup>th</sup> sub-sample for the t<sup>th</sup> sub-stratum of s<sup>th</sup> stratum. For ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

#### 3.2 FORMULAE FOR ESTIMATION OF AGGREGATES FOR A STRATUM × SUB-STRATUM:

##### 3.2.1 Questionnaire LHQ (Rural/Urban):

3.2.1.1 For estimating the number of households in a stratum × sub-stratum possessing a characteristic:

$$\hat{Y} = \sum_{r=1}^{10} \sum_{m=1}^2 \left[ \frac{N}{n} \times \sum_{i=1}^n D_1 \times y_{irm} \right]$$

where  $y_{irm}$  is the total number of households possessing the characteristic  $y$  in  $i^{\text{th}}$  FSU of  $r^{\text{th}}$  panel and  $m^{\text{th}}$  sub-sample respectively.

### **3.2.2 Formulae for Estimation of Aggregates for a stratum \* sub-stratum Questionnaire HCQ, FDQ, CSQ and DGQ:**

3.2.2.1 For  $j^{\text{th}}$  second-stage stratum of a stratum  $\times$  sub-stratum:

$$\hat{Y}_j = \sum_{r=1}^{10} \sum_{m=1}^2 \left[ \frac{N}{n_j} \sum_{i=1}^{n_j} \left[ D_1 * \frac{H_{ij}}{h_{ij}} \sum_{k=1}^{h_{ij}} y_{ijkrm} \right] \right]$$

where  $n_j$  is the number of sample FSUs with non-void  $j^{\text{th}}$  second-stage stratum.

3.2.2.2 Aggregate  $\hat{Y}$  is obtained combining all the second-stage strata:

$$\hat{Y} = \sum_{j=1}^3 \hat{Y}_j$$

Note: Values of  $j$  for all the questionnaire is 3.

### **3.3 OVERALL ESTIMATE FOR AGGREGATES FOR A STRATUM $\times$ SUB-STRATUM:**

3.3.1 Overall estimate for a stratum  $\times$  sub-stratum ( $\hat{Y}_{st}$ ) will be obtained as

$$\widehat{y_{st}} = \sum_{r=1}^{10} \sum_{m=1}^2 \left[ \sum_{i=1}^{n_{stj}} \frac{N_{st}}{n_{stj}} \times D_1 \times \sum_{j=1}^3 \frac{H_{stijrm}}{h_{stijrm}} \times \sum_{k=1}^{h_{stijrm}} y_{stijkrm} \right]$$

3.3.2 Overall Estimate for Aggregates for a stratum:

$$\widehat{y_s} = \sum_t \widehat{y_{st}}$$

### **3.4 OVERALL ESTIMATE OF AGGREGATES AT STATE/UT/ALL-INDIA LEVEL:**

The overall estimate  $\hat{Y}$  at the State/ UT/ all-India level is obtained by summing the stratum estimates  $\hat{Y}_s$  over all strata belonging to the State/ UT/ all-India.

$$\hat{Y} = \sum_s \widehat{y_s}$$

### **3.5 ESTIMATION OF MONTHLY PER CAPITA CONSUMER EXPENDITURE (MPCE) FROM THREE QUESTIONNAIRES:**

3.5.0 The monthly per capita consumption expenditure (MPCE) of a household, defined as “*the total value of monthly consumption of goods & services of the household divided by the number of members of the household*” is based on the data collected from those households who provided information for all the three visits, i.e., the households from whom data pertaining to all the three questionnaires, namely, FDQ, CSQ and DGQ are available. The multiplier computed from the data of third visit is used for generation of the estimates. Household size recorded at the time of canvassing of food questionnaire (FDQ) is considered for calculating MPCE.

3.5.1 Let  $E_1$ ,  $E_2$  &  $E_3$  be the total value of expenditure on food, consumable & services and durables items respectively for a particular sampled household, compiled from the three questionnaires, namely FDQ, CSQ & DGQ. Further, assume that  $P_1$ ,  $P_2$  &  $P_3$  be the number of household members (i.e., size of the household) recorded during the time of canvassing FDQ, CSQ and DGQ questionnaire, respectively.

3.5.2 Then the total monthly expenditure of the household, say,  $TE$  is computed as:

$$TE = E_1 + (E_2/P_2) \times P_1 + (E_3/P_3) \times P_1$$

3.5.3 Consequently, the MPCE of the household is computed as:

$$MPCE = TE/P_1.$$

### **3.6 ESTIMATES OF RATIOS:**

3.6.0 Let  $\hat{Y}$  and  $\hat{X}$  be the overall estimates of the aggregates Y and X for two characteristics y and x respectively at the District/State/ UT/ all-India level.

Then the combined ratio estimates ( $\hat{R}$ ) of the ratio ( $R = \frac{Y}{X}$ ) is obtained as  $\hat{R} = \frac{\hat{Y}}{\hat{X}}$ .

### 3.7 ESTIMATION OF ERRORS:

#### 3.7.1 Formula for estimated variance (for Rural/Urban)

3.7.1.1 FSUs and USU (households) are selected by SRSWOR method. If  $i^{\text{th}}$  FSU has been selected,  $h_i$  unit is selected from this particular FSU x SSS by SRSWOR method. For simplicity of formula some obvious suffixes ( $r^{\text{th}}$  panel,  $m^{\text{th}}$  sub-sample) have been suppressed in following formulas for RSE (%) calculation.

##### (a) Formula for aggregate $\hat{Y}$ (for Rural/Urban)

$$\widehat{Y_{ij}} = H_{ij} * \overline{y_{ij}} * D_{1si} \text{ and } \overline{y_{ij}} = \sum_1^{h_{ij}} y_{ijk} / h_{ij}$$

$$\widehat{Var}(\hat{Y}) = \sum_s \widehat{Var}(\hat{Y}_s) = \sum_s \sum_t \sum_j \widehat{Var}(\hat{Y}_{stj})$$

$$\widehat{Var}(\widehat{Y_{stj}}) = N_{st}^2 \left( \frac{1}{n_{stj}} - \frac{1}{N_{st}} \right) (1/(n_{stj} - 1)) \sum_1^{n_{stj}} (H_{stij} * D_{1sti} * \overline{y_{stij}} - \frac{1}{n_{stj}} \sum_1^{n_{stj}} H_{stij} * D_{1sti} \overline{y_{stij}})^2 + \\ \frac{N_{st}}{n_{stj}} \sum_1^{n_{stj}} H_{stij}^2 * D_{1sti}^2 \left( \frac{1}{h_{stij}} - \frac{1}{H_{stij} * D_{1si}} \right) s^2_{wij}$$

$$\text{where } s^2_{wij} = \frac{1}{(h_{stij} - 1)} \sum_{k=1}^{h_{stij}} (y_{stijk} - \overline{y_{stij}})^2$$

##### (b) Formula for ratio $\hat{R}$ (for Rural/Urban)

It may be noted that  $X^2$   $MSE(\hat{R})$  is unbiasedly estimated by  $V(\hat{Y} - R\hat{X})$

$V(\hat{Y} - R\hat{X}) = v(\hat{u})$  where  $u_{ijk} = (y_{ijk} - R_{xijk})$ ,  $U_i = (Y_i - RX_i)$  and  $U = (Y - RX) = 0$  at domain level (State).

$$\widehat{X^2 MSE}(\hat{R}) = \widehat{V}(\hat{U}) \text{ at } R = \hat{R}$$

$$\widehat{Y_{stij}} = \frac{1}{N_{st}} * \sum_k y_{stijk} * n_{stj} * \text{multiplier} \text{ and } \widehat{X_{stij}} = \frac{1}{N_{st}} * \sum_k x_{stijk} * n_{stj} * \text{multiplier}$$

$$MSE(\hat{R}) = \frac{1}{\hat{X}^2} \sum_s \sum_t MSE_{st}(\hat{R})$$

$$\widehat{MSE}_{st}(\hat{R}) = \sum_j N_{st}^2 \left( \frac{1}{n_{stj}} - \frac{1}{N_{st}} \right) \frac{1}{(n_{stj} - 1)} \sum_1^{n_{stj}} (H_{ij} D_{1si} \overline{u_{ij}} - \frac{1}{n_{stj}} \sum_1^{n_{stj}} H_{ij} D_{1si} \overline{u_{ij}})^2 + \\ \sum_j \frac{N_{st}}{n_{stj}} \sum_1^{n_{stj}} H_{ij}^2 * D_{1si}^2 \left( \frac{1}{h_{ij}} - \frac{1}{H_{ij} * D_{1si}} \right) s_{uij}^2$$

$$\text{where } s_{uij}^2 = \frac{1}{(h_{ij} - 1)} \sum_{k=1}^{h_{ij}} (u_{ijk} - \overline{u_{ij}})^2 ; \overline{u_{ij}} = \overline{y_{ij}} - \hat{R} \overline{x_{ij}}$$

### 3.7.2 Estimates of Relative Standard Error (RSE):

$$RSE(\hat{Y}) = \frac{\sqrt{Var(\hat{Y})}}{\hat{Y}} \times 100$$

$$RSE(\hat{R}) = \frac{\sqrt{MSE(\hat{R})}}{\hat{R}} \times 100$$

## 4. MULTIPLIERS:

4.0 The formulae for multipliers at stratum/sub-stratum/second-stage stratum level for a Questionnaire type are given below.

Questionnaire	Sector	Formula for multipliers
LHQ	Rural/urban	$\frac{N_{st}}{n_{st}}$
HCQ, FDQ, CSQ and DGQ	Rural/urban	$\frac{N_{stj}}{n_{stj}} * D1 * \frac{H_{stij}}{h_{stij}}$
		j = 1, 2, 3

**Note:** Multipliers are computed on the basis of information available in the listing Schedule LHQ, irrespective of any misclassification observed between the listing Schedule and detailed enquiry Schedule.

*Questionnaires of the  
Survey*

---

**GOVERNMENT OF INDIA**  
**NATIONAL STATISTICAL OFFICE**  
**HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY:2022-23**  
**AUGUST, 2022 – JULY, 2023**  
**QUESTIONNAIRE - HCQ: HOUSEHOLD CHARACTERISTICS**

### Section1: Identification of sample household

*Information on items 1.1 to 1.7 and 1.9 will be available from the sample list. Information on items 1.10 to 1.12 will be available from the Questionnaire for listing (LHQ)*

1.1. sector:	<input type="radio"/> rural <input type="radio"/> urban
1.2. state/u.t name:	
1.3. district name:	
1.4.name of sub-district/tehsil/town	
1.5. village name:	
1.6.investigator unit number /block number:	
1.7. sample sub-unit (SU) number:	
1.8. questionnaire number:	HCQ
1.9. serial number of sample FSU	
1.10. sample Sub-division number:	
1.11. second-stage stratum number:	
1.12. sample household number:	
1.13. survey code <i>[If 2 or 3 in 1.13 go to 1.14]</i>	<input type="radio"/> original -1, <input type="radio"/> substitute -2, <input type="radio"/> casualty -3
1.14. reason code for substitution/ casualty of the original household <i>(the interviewer will fill up this item if a substituted household is canvassed or the household is a casualty)</i>	<input type="radio"/> informant busy -1, <input type="radio"/> members away from home -2, <input type="radio"/> informant non-cooperative -3, <input type="radio"/> others -9

## Section 2: Household size

## **OBJECTIVES AND SCOPE**

- To determine the household size of the sample household.

## IMPLEMENTATION NOTES

- For each of the selected household total household size will be ascertained and recorded.

## Section 3: Details of the household members

### OBJECTIVES AND SCOPE

- To record basic demographics on gender, age, relationship to head of household, marital status, education level, no. of days stayed away from home, no. of meals usually taken for each member of the household listed in Section 2.

### IMPLEMENTATION NOTES

- All the household members of the selected household will be listed and their related information will be recorded.
- Total number of members listed in Section 3 will be same as household size in Section 2.

Section 3: demographic and other particulars of household members																
srl. no.	name of member	relation to head (code)	gender (male-1, female-2, transgender -3)	age (years)	marital status (code)	highest educational level attained (code)	if code 03 – 13 in col. (7), total year of education completed	whether used internet* from any location during last 30 days (yes-1, no - 2)	no. of days stayed away from home during last 30 days	no. of meals usually taken in a day	no. of meals taken during last 30 days				at home	
											away from home					
											free of cost					
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)	(15)	(16)	

#### Instruction: Codes for Section 3

- Col. (3) : relation to head: self-1, spouse of head-2, married child-3, spouse of married child-4, unmarried child-5, grandchild-6, father/mother/father-in-law/mother-in-law-7, brother/sister/brother-in-law/sister-in-law/other relatives-8, servants/employees/other non-relatives-9
- Col. (6) : marital status: never married – 1, currently married – 2, widowed – 3, divorced/separated – 4
- Col. (7): highest educational level attained:
  - not literate (i.e. not able to read or write a simple message with understanding in any language) -01
  - literate with non-formal education (like NFEC, AEC, TLC, literate without any schooling, etc.)-02
  - literate with formal education
  - below primary-03
  - primary -04
  - upper primary/middle -05
  - secondary -06
  - higher secondary -07
  - diploma /certificate course (up to secondary)-08
  - diploma/certificate course (higher secondary)-10
  - diploma/certificate course (graduation & above)-11
  - graduate -12
  - post graduate and above -13

\*applicable for persons of age >=3 years (i.e., Col. 5>=3)

Note: Information on Col. 10 – 16 is to be collected while canvassing the Questionnaire FDQ.

## Section 4: Household characteristics

### OBJECTIVES AND SCOPE

- To record household characteristics, owning of land and type of ration card possessed by the household.

### IMPLEMENTATION NOTES

- To be canvassed for all the selected households.

<b>Section 4: Household characteristics</b>		
<b>Question no.</b>	<b>Question description and code structure</b>	<b>Recorded entry</b>
Q4.1	<p>Whether any household member (excluding those employed by the household and paying guests) was engaged in economic activities during last 365 days?</p> <ul style="list-style-type: none"> <li><input type="radio"/> yes-1</li> <li><input type="radio"/> no-2</li> </ul> <p><i>If code is 1 in Q4.1 fill up Q4.2 to Q4.6 else go to Q4.10</i></p> <p><i>(Instruction:</i></p> <p><i>Economic activity includes:</i></p> <p><i>(i) all the market activities, i.e., the activities performed for pay or profit which result in production of goods and services for exchange,</i></p> <p><i>(ii) of the non-market activities,</i></p> <p><i>(a) all the activities relating to the primary sector (i.e., industry Divisions 01 to 09 of NIC-2008) which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods, including threshing and storing of grains for own consumption.</i></p> <p style="text-align: center;"><i>and</i></p> <p><i>(b) the activities relating to the own-account production of fixed assets. Own account production of fixed assets includes construction of own houses, roads, wells, etc. and of machinery, tools, etc. for household enterprise and also construction of any private or community facilities free of charge. )</i></p>	
Q4.2	<p>Write the description of the occupation of the economic activity of the household members which fetched the maximum earnings to the household during the last 365 days preceding the date of survey</p> <p><i>[Instruction: List all the occupations pertaining to economic activities pursued by the members. Out of the occupations listed that one which fetched the maximum earnings to the household during the last 365 days preceding the date of survey would be considered as the principal household occupation.]</i></p>	Text Box
Q4.3	Record the 3-digit code of the occupation (as per National Classification of Occupation (NCO 2015)) recorded in Q4.2	DDM (3-digit code of NCO 2015)
Q4.4	<p>Write the description of the industry of activity corresponding to the occupation recorded in Q4.2, which fetched the maximum earnings to the household during the last 365 days preceding the date of survey</p> <p><i>[Instruction:</i></p> <ul style="list-style-type: none"> <li><i>If corresponding to the principal occupation there is only one industry of activity, record the description of that industry of activity.</i></li> <li><i>If the principal occupation is pursued in different industries, the particular industry out of all the different industries corresponding to the principal occupation, which fetched the maximum earnings, should be considered as the principal industry of the household.]</i></li> </ul>	
Q4.5	Record the 5-digit code of the National Industrial Classification (NIC-2008) for the industry of activity recorded in Q4.4	DDM (5-digit code of NIC 2008)
Q4.6	From which of the following broad activities maximum income was derived by the household during last 365 days preceding the date of survey?	
	<ul style="list-style-type: none"> <li><input type="radio"/> self-employment -1</li> <li><input type="radio"/> regular wage/salary earning -2</li> <li><input type="radio"/> casual labour -3</li> </ul>	

<b>Section 4: Household characteristics</b>		
<b>Question no.</b>	<b>Question description and code structure</b>	<b>Recorded entry</b>
	<p>[Instruction: for urban samples, go to Q4.10 For rural samples,</p> <ul style="list-style-type: none"> <li>• if 1 in Q4.6, go to Q4.7</li> <li>• if 2 in Q4.6, go to Q4.8</li> <li>• if 3 in Q4.6, go to Q4.9]</li> </ul> <p>(Note:  <b>self-employment:</b> Persons who operate their own farm or non-farm enterprises or are engaged independently in a profession or trade on own-account or with one or a few partners are deemed to be self-employed in household enterprises.  <b>regular wage/salary earning:</b> Persons working in other's farm or non-farm enterprises (both household and non-household) and getting in return salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract) are the regular wage/salaried employees.  <b>casual labour:</b> A person casually engaged in other's farm or non-farm enterprises (both household and non-household including in public works) and getting in return wage according to the terms of the daily or periodic work contract is a casual wage labour.)</p>	
Q4.7	Whether the major income from self-employment was from agricultural sector or non-agricultural sector? <ul style="list-style-type: none"> <li>○ <i>self-employment in agriculture -1</i></li> <li>○ <i>self-employment in non-agriculture-2</i></li> </ul>	
Q4.8	Whether the major income from regular wage/ salary earning was from agricultural sector or non-agricultural sector? <ul style="list-style-type: none"> <li>○ <i>regular wage/salary earning in agriculture-3</i></li> <li>○ <i>regular wage/salary earning in non-agriculture-4</i></li> </ul>	
Q4.9	Whether the major income from casual labour was from agricultural sector or non-agricultural sector? <ul style="list-style-type: none"> <li>○ <i>casual labour in agriculture -5</i></li> <li>○ <i>casual labour in non-agriculture-6</i></li> </ul>	
Q4.10	Household type <p>[Instruction:</p> <p><i>For rural samples:</i></p> <ul style="list-style-type: none"> <li>• <i>code 9 if Q4.1 is 2</i></li> <li>• <i>else make entry as the entry in Q4.7/Q4.8/Q4.9 as the case may be</i></li> </ul> <p><i>For urban samples:</i></p> <ul style="list-style-type: none"> <li>• <i>code 9 if Q4.1 is 2</i></li> <li>• <i>else make as the entry in entry in Q4.6]</i></li> </ul>	
Q4.11	What is the Religion of the head of the household? <ul style="list-style-type: none"> <li>○ <i>Hinduism-1</i></li> <li>○ <i>Islam-2</i></li> <li>○ <i>Christianity -3</i></li> <li>○ <i>Sikhism-4</i></li> <li>○ <i>Jainism-5</i></li> <li>○ <i>Buddhism-6</i></li> <li>○ <i>Zoroastrianism-7</i></li> <li>○ <i>Others-9</i></li> <li>○ <i>Not reported-0</i></li> </ul>	
Q4.12	What is the Social group of the head of the household? <ul style="list-style-type: none"> <li>○ <i>scheduled tribe (ST)-1</i></li> <li>○ <i>scheduled caste (SC)-2</i></li> <li>○ <i>other backward class (OBC)-3</i></li> <li>○ <i>others-9</i></li> <li>○ <i>Not reported-0</i></li> </ul>	
Q4.13	Does the household own (owned & possessed or leased out) any land (within the country) as on the date of survey? <ul style="list-style-type: none"> <li>○ <i>yes-1</i></li> <li>○ <i>no-2</i></li> </ul> <p><i>If code is 1 in Q4.13 go to Q4.14 &amp; Q4.15, else go to Q4.16</i></p>	

<b>Section 4: Household characteristics</b>		
<b>Question no.</b>	<b>Question description and code structure</b>	<b>Recorded entry</b>
Q4.14	<p>If code 1 in Q4.13, What is the type of land the household owned?</p> <ul style="list-style-type: none"> <li><input type="radio"/> Homestead only-1</li> <li><input type="radio"/> Homestead and other land-2</li> <li><input type="radio"/> Other land only-3</li> </ul>	
Q4.15	<p>What is the total area of all owned (owned and possessed or leased out) land (within the country) by the household as on the date of survey (<b>area in acre</b>)?  <i>(the area is to be reported in two places of decimal)</i>  <i>[Note: 1 hectare=10,000 square metre, 1 acre = 0.4047 hectare, 1 acre = 4047 sq. metre]</i></p>	
Q4.16	<p>Does the household have a dwelling unit (i.e., unit of accommodation availed of by the household for residential purpose) at present place of enumeration?</p> <ul style="list-style-type: none"> <li><input type="radio"/> yes-1</li> <li><input type="radio"/> no-2</li> </ul> <p><i>Note: Dwelling unit refers to the unit of accommodation where the household is residing during the date of survey. This will include owned, rented or otherwise occupied house/flat. Households living more or less regularly under staircase, in tents, in pipes, under bridges, in purely temporary flimsy improvisations built by the roadside (which are liable to be removed at any moment) are considered to have no dwelling.</i></p> <p><i>If code 1 in Q4.16 go to Q4.17 otherwise go to Q4.21</i></p>	
Q4.17	<p>If code 1 in Q4.16, What is the type of dwelling unit of the household?</p> <ul style="list-style-type: none"> <li><input type="radio"/> owned -1</li> <li><input type="radio"/> hired-2</li> <li><input type="radio"/> others-3</li> </ul>	
Q4.18	<p>If code 1 in Q4.16, What is the basic building material used for construction of the major portion of the wall of the dwelling unit of the household?</p> <ul style="list-style-type: none"> <li><input type="radio"/> grass/ straw/ leaves/ reeds/ bamboo, etc. - 1</li> <li><input type="radio"/> mud (with /without bamboo) /unburnt brick - 2</li> <li><input type="radio"/> canvas / cloth - 3</li> <li><input type="radio"/> other katcha - 4</li> <li><input type="radio"/> timber - 5</li> <li><input type="radio"/> burnt brick /stone/ lime stone - 6</li> <li><input type="radio"/> iron or other metal sheet - 7</li> <li><input type="radio"/> cement / RBC / RCC - 8</li> <li><input type="radio"/> other pucca – 9</li> </ul>	
Q4.19	<p>If code 1 in Q4.16, What is the basic building material used for construction of the major portion of the outer exposed part of the roof of the dwelling unit of the household?</p> <ul style="list-style-type: none"> <li><input type="radio"/> grass/ straw/ leaves/ reeds/ bamboo etc. - 1</li> <li><input type="radio"/> mud / unburnt brick - 2</li> <li><input type="radio"/> canvas / cloth - 3</li> <li><input type="radio"/> other katcha – 4</li> <li><input type="radio"/> tiles / slate - 5</li> <li><input type="radio"/> burnt brick / stone / lime stone - 6</li> <li><input type="radio"/> iron / zinc /other metal sheet /asbestos sheet - 7</li> <li><input type="radio"/> cement / RBC / RCC - 8</li> <li><input type="radio"/> other pucca – 9</li> </ul>	

<b>Section 4: Household characteristics</b>		
<b>Question no.</b>	<b>Question description and code structure</b>	<b>Recorded entry</b>
	<p><i>Note: If the roof is mainly made of bricks, tiles, stone, etc., with the mud, cement or lime plaster exposed to the sky, the material of roof will not be mud, cement, lime, etc. but it will be brick, tile, stone, etc. which constituted the fabric of the roof.</i></p>	
Q4.20	<p>If code 1 in Q4.16,</p> <p>What is the basic building material used for construction of the major portion of the floor of the dwelling unit of the household?</p> <ul style="list-style-type: none"> <li><input type="radio"/> grass/ straw/ leaves/ reeds/ bamboo etc. - 1</li> <li><input type="radio"/> mud / unburnt brick - 2</li> <li><input type="radio"/> canvas- 3</li> <li><input type="radio"/> other katcha – 4</li> <li><input type="radio"/> tiles / slate - 5</li> <li><input type="radio"/> burnt brick / stone / lime stone - 6</li> <li><input type="radio"/> iron / zinc /other metal sheet /asbestos sheet - 7</li> <li><input type="radio"/> cement / RBC / RCC - 8</li> <li><input type="radio"/> other pucca – 9</li> </ul>	
Q4.21	<p>What is the primary source of energy of the household for cooking?</p> <ul style="list-style-type: none"> <li><input type="radio"/> firewood and chips-01</li> <li><input type="radio"/> LPG-02</li> <li><input type="radio"/> other natural gas -03</li> <li><input type="radio"/> dung cake-04</li> <li><input type="radio"/> kerosene-05</li> <li><input type="radio"/> coke, coal-06</li> <li><input type="radio"/> gobar gas-07</li> <li><input type="radio"/> other biogas -08</li> <li><input type="radio"/> charcoal-10</li> <li><input type="radio"/> electricity (incl. generated by solar or wind power generators) -11</li> <li><input type="radio"/> no cooking arrangement-12</li> <li><input type="radio"/> others-09</li> </ul>	
Q4.22	<p>What is the primary source of energy of the household for lighting?</p> <ul style="list-style-type: none"> <li><input type="radio"/> electricity (incl. generated by solar or wind power generators) -1</li> <li><input type="radio"/> kerosene-2</li> <li><input type="radio"/> other oil -3</li> <li><input type="radio"/> gas-4</li> <li><input type="radio"/> candle-5</li> <li><input type="radio"/> no lighting arrangement-6</li> <li><input type="radio"/> others-9</li> </ul>	
Q4.23	<p>What is the source of drinking water from which most of the drinking water is obtained by the household during last 365 days?</p> <ul style="list-style-type: none"> <li><input type="radio"/> bottled water - 01</li> <li><input type="radio"/> piped water into dwelling - 02</li> <li><input type="radio"/> piped water to yard/plot - 03</li> <li><input type="radio"/> piped water from neighbour - 04</li> <li><input type="radio"/> public tap/standpipe - 05</li> <li><input type="radio"/> tube well - 06</li> <li><input type="radio"/> hand pump - 07</li> <li><input type="radio"/> well: protected - 08</li> <li><input type="radio"/> well: unprotected - 09</li> <li><input type="radio"/> tanker-truck: public - 10</li> <li><input type="radio"/> tanker-truck: private - 11</li> <li><input type="radio"/> spring: protected - 12</li> <li><input type="radio"/> spring: unprotected - 13</li> <li><input type="radio"/> rainwater collection -14</li> <li><input type="radio"/> surface water: tank/pond - 15</li> <li><input type="radio"/> other surface water (river, dam, stream, canal, lake, etc.) - 16</li> <li><input type="radio"/> others (cart with small tank or drum, etc) - 19</li> </ul>	

<b>Section 4: Household characteristics</b>		
<b>Question no.</b>	<b>Question description and code structure</b>	<b>Recorded entry</b>
Q4.24	<p>What is the time taken by the household for a single trip to reach the source (from which most of the drinking water is fetched), obtain water and back to household?          (To be reported in minutes and in whole number)</p> <p><i>Note:</i></p> <ul style="list-style-type: none"> <li>• <i>The time usually taken for fetching drinking water in a single trip will be obtained by considering the total time usually required for reaching to the source of drinking water from which most of the drinking water is obtained, waiting time at the source of drinking water (i.e., time spent in queue and the time required for filling the container) and coming back to the dwelling unit with water in a single occasion.</i></li> <li>• <i>In determining the time taken for a single trip, time spent in socialising, gossiping, shopping, free collection of vegetables, etc., will be excluded.</i></li> </ul>	
Q4.25	<p>What is the type of access of the household to latrine?</p> <ul style="list-style-type: none"> <li><input type="radio"/> <i>exclusive use of household - 1</i></li> <li><input type="radio"/> <i>common use of households in the building - 2</i></li> <li><input type="radio"/> <i>public/community latrine without payment - 3</i></li> <li><input type="radio"/> <i>public/community latrine with payment - 4</i></li> <li><input type="radio"/> <i>others - 9</i></li> <li><input type="radio"/> <i>no access to latrine – 5</i></li> </ul> <p><i>Note:</i></p> <ul style="list-style-type: none"> <li>• <i>A 'latrine' is defined as an infrastructure which allows safer and more hygienic disposal of human excreta than open defecation.</i></li> <li>• <i>'Access of the household to latrine' is defined in terms of the latrine facility that can be used by the majority of the household members, irrespective of whether it is being used by them or not.</i></li> </ul> <p><b>If any of codes 1 to 4 or 9 in Q4.25, go to Q4.26 otherwise go to Q4.29</b></p>	
Q4.26	<p>What is the type of latrine in which the household has access?</p> <ul style="list-style-type: none"> <li><input type="radio"/> <i>flush/pour-flush to: piped sewer system - 01</i></li> <li><input type="radio"/> <i>flush/pour-flush to: septic tank - 02</i></li> <li><input type="radio"/> <i>flush/pour-flush to: twin leach pit - 03</i></li> <li><input type="radio"/> <i>flush/pour-flush to: single leach pit - 04</i></li> <li><input type="radio"/> <i>flush/pour-flush to: elsewhere (open drain, open pit, open field, etc.) - 05</i></li> <li><input type="radio"/> <i>ventilated improved pit latrine - 06</i></li> <li><input type="radio"/> <i>pit latrine with slab - 07</i></li> <li><input type="radio"/> <i>pit latrine without slab/open pit - 08</i></li> <li><input type="radio"/> <i>composting latrine - 10</i></li> <li><input type="radio"/> <i>open drain/nallah -11</i></li> <li><input type="radio"/> <i>others - 19</i></li> </ul> <p><i>Note:</i></p> <ul style="list-style-type: none"> <li>• <i>A 'latrine' is defined as an infrastructure which allows safer and more hygienic disposal of human excreta than open defecation.</i></li> <li>• <i>'Access of the household to latrine' is defined in terms of the latrine facility that can be used by the majority of the household members, irrespective of whether it is being used by them or not.</i></li> </ul>	

<b>Section 4: Household characteristics</b>		
<b>Question no.</b>	<b>Question description and code structure</b>	<b>Recorded entry</b>
Q4.29	What is the type of ration card possessed by the household as on the date of survey? <input type="radio"/> <i>Antyodaya Anna Yojana (AAY)-1</i> <input type="radio"/> <i>Below Poverty Line (BPL)-2</i> <input type="radio"/> <i>Above Poverty Line (APL)-3</i> <input type="radio"/> <i>Priority House Holds (PHH)-4</i> <input type="radio"/> <i>State Food Security Scheme (SFSS)-5</i> <input type="radio"/> <i>Others -9</i> <input type="radio"/> <i>No ration card- 0</i>	
Q4.30	(for rural only) Whether any prevailing rate of rent in the locality is available? <input type="radio"/> <i>yes-1</i> <input type="radio"/> <i>no-2</i>	
Q4.31	Whether the household benefitted from Pradhan Mantri Garib Kalyan Yojana (PMGKY) as on the date of the survey? <input type="radio"/> <i>yes-1</i> <input type="radio"/> <i>no-2</i>  <i>Note: If the household has received benefits under Pradhan Mantri Garib Kalyan Ann Yojana (PMGKAY), then also code 1 (yes) is to be reported against this question.</i>	
Q4.32	Whether any member of the household of age 0 - 18 years died during the period of last 5 years preceding the date of survey? <input type="radio"/> <i>yes-1</i> <input type="radio"/> <i>no-2</i>	
Q4.33	<i>If yes in Q4.32,</i> How many members of the household of age 0 – 18 years died during the period of last 5 years preceding the date of survey?	

- [Go to Section 1.1](#)

## Section 1A: Identification of sample household (To be canvassed only in Visits -2 & 3)

*Information on items 1.1A to 1.7A and 1.9A to 1.13A will be auto-generated from Section 1 of the previous visit. Information on item 1.8A will be auto-generated depending on the questionnaire canvassed in the previous visit.*

1.1A. sector:	<input type="radio"/> rural <input type="radio"/> urban
1.2A. state/u.t name:	
1.3A. district name:	
1.4A.name of sub-district/tehsil/town	
1.5A. village name:	
1.6A.investigator unit number /block number:	
1.7A. sample sub-unit (SU) number:	
1.8A. questionnaire number:	FDQ/CSQ/DGQ
1.9A. serial number of sample FSU	
1.10A. sample Sub-division number:	
1.11A. second-stage stratum number:	
1.12A. sample household number:	
1.13A. survey code	<input type="radio"/> original -1
1.14A. Is household available for survey?	<input type="radio"/> yes - 1 <input type="radio"/> no - 2

## **Section 2A: Household size (To be canvassed only in Visits -2 & 3)**

## **OBJECTIVES AND SCOPE**

- To determine the household size of the sample household.

## IMPLEMENTATION NOTES

- For each of the selected household total household size will be ascertained and recorded.

## Section 3A: Details of the household members (To be canvassed only in Visits -2 & 3)

### OBJECTIVES AND SCOPE

- To record basic demographics on gender, age, relationship to head of household, marital status, education level, no. of days stayed away from home, no. of meals usually taken for each member of the household listed in Section 2A.

### IMPLEMENTATION NOTES

- All the household members of the selected household will be listed and their related information will be recorded.
- Total number of members listed in Sections 3A.1 & 3A.2 will be same as household size in Section 2A.

Section 3A.1: demographic and other particulars of the erstwhile household members																
srl. no.	name of member	relation to head (ccode)	gender (male-1, female-2, transgender-3)	age (years)	marital status (code)	highest educational level attained (code)	if code 03 – 13 in col. ## Section 8: Consumption of energy (fuel, light) during the last 30 days

### OBJECTIVES AND SCOPE

- This section is for recording the quantity and value of consumption of energy, i.e., fuel and light by the household during the last 30 days.

### IMPLEMENTATION NOTES

- To be canvassed for all the selected households.

<b>Section 8.1: Consumption of energy (fuel &amp; light) during the last 30 days</b>																																																																														
<b>Question no.</b>	<b>Question description and code structure</b>																																																																													
Q8.1	What is the quantity and value of the consumed <i>energy (fuel, light, etc.)</i> during the last 30 days?																																																																													
	<table border="1"> <thead> <tr> <th rowspan="3">item</th> <th rowspan="3">item code</th> <th colspan="5">quantity and value of the item consumed during last 30 days</th> </tr> <tr> <th colspan="2">consumption out of home produce</th> <th colspan="2">total consumption</th> <th rowspan="2">source<sup>#</sup></th> </tr> <tr> <th>quantity (0.000)</th> <th>value (Rs.)</th> <th>quantity (0.000)</th> <th>value (Rs.)</th> </tr> </thead> <tbody> <tr> <td>(1)</td> <td>(2)</td> <td>(3)</td> <td>(4)</td> <td>(5)</td> <td>(6)</td> <td>(7)</td> </tr> <tr> <td>electricity (std. unit)</td> <td>332</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>LPG<sup>®</sup> [excl. conveyance]</td> <td>338</td> <td></td> <td></td> <td></td> <td></td> <td>@</td> </tr> <tr> <td>firewood and chips</td> <td>331</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>kerosene – PDS (litre)</td> <td>334</td> <td></td> <td></td> <td></td> <td></td> <td>1</td> </tr> <tr> <td>kerosene – other sources (litre)</td> <td>335</td> <td></td> <td></td> <td></td> <td></td> <td>@</td> </tr> <tr> <td>other fuel<sup>&amp;</sup> (charcoal, biogas, gobar gas, coal, dung cake, petrol (litre) [excl. conveyance], diesel (litre) [excl. conveyance], other natural gas<sup>^</sup> (CNG, etc.), matches (box), candle (no.), etc.)</td> <td>096</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td><b>fuel and light: sub-total</b></td> <td><b>349</b></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table>						item	item code	quantity and value of the item consumed during last 30 days					consumption out of home produce		total consumption		source <sup>#</sup>	quantity (0.000)	value (Rs.)	quantity (0.000)	value (Rs.) ## Section 9: Expenditure on toilet articles and other household consumables during the last 30 days

### OBJECTIVES AND SCOPE

- This section is for recording the expenditure incurred on toilet articles and other household consumable items during the last 30 days.

### IMPLEMENTATION NOTES

- To be canvassed for all the selected households.

#### Section 9.1: Expenditure on toilet articles during the last 30 days

Question no.	Question description and code structure		
	Item	item code	value (Rs.)
	(1)	(2)	(3)
Q9.1	What is the value of <i>toilet articles</i> procured by the household during last 30 days?		
	toilet soap, body-wash, hand-wash, shower gel, face-wash	450	
	sanitizer	016	
	toothpaste, mouthwash, toothbrush, etc.	451	
	shampoo, conditioner, hair serum/gel, hair cream	453	
	hair oil, hair colour	017	
	other hair products, accessories, comb, etc.	018	
	powder, cream, body lotion, moisturizers	452	
	other beauty products: lipstick, nail polish, compact & foundation, eye make-up kit (kajal/surma, mascara, shadow, liner, etc.), etc.	020	
	perfume, body spray, deodorant, roll-ons, etc.	021	
	sanitary napkins	456	
	baby products (diapers, lotion, powder, etc.)	022	
	shaving blades, shaving stick, razor	454	
	shaving cream, shaving foam, aftershave lotion, aftershave balm	455	
	other toilet articles (body oil, make-up brushes, etc.)	457	
	<b>toilet articles: sub-total</b>	<b>459</b>	

#### Section 9.2: Expenditure on other household consumables during the last 30 days

Question no.	Question description and code structure		
	Item	item code	value (Rs.)
	(1)	(2)	(3)
Q9.2	What is the value of <i>other household consumables</i> procured by the household during last 30 days?		
	washing soap/soda/powder/liquid detergent	466	
	other washing requisites	467	
	floor cleaner, acid, toilet cleaner	465	
	mosquito repellent, insecticide, anti-rodent, etc.	471	
	bucket & other plastic goods	464	
	incense ( <i>agarbatti</i> ), room freshener	468	
	flower (fresh): all purposes	470	
	LED bulb, CFL bulbs	023	
	other electric bulb, tubelight, decorative lights	460	
	earthenware, paperware, thermocol plates, etc.	462	
	electric batteries	461	
	glassware	463	
	other petty articles like coir, rope, door mat, non-durable electric goods, etc.	472	
	<b>other household consumables: sub-total</b>	<b>479</b>

## Section 14: Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use during the last 365 days

### OBJECTIVES AND SCOPE

- This section is for recording the expenditure incurred by the household on purchase (including repair and maintenance) and construction of durable goods for domestic use during the last 365 days.

### IMPLEMENTATION NOTES

- To be canvassed for all the selected households.

#### Section 14.1: Expenditure for purchase (including repair & maintenance) of personal goods for domestic use during the last 365 days

Question no.	Question description and code structure							
	item	item code	first-hand purchase			cost of repair & maintenance (Rs.)	second-hand purchase	
Q14.1			no. of item purchased	whether purchased on hire yes-1, no-2	value (Rs.)		no. of item purchased	value (Rs.)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	
spectacles/goggles, contact lenses	440							
umbrella, raincoat, helmet	441							
other minor durable-type goods (like torch, lock, lighter,etc.)	442							
mobile handset	623							
telephone instrument (landline)	624							
PC/ Laptop/ tablet, other peripherals incl. software	622							
clock, watch, smartwatch, fitness tracker	620							
back-pack, handbags, vanity bags, purse, clutch, etc.	554							
headphone, earphone, ear pod, airpod, bluetooth devices/speakers etc.	035							
other machines for household work	621							
any other personal goods(power banks, hair dryers, straightener/curler,trimmer, groomer, epilator, etc.)	625							
other personal goods: sub-total	629							

**Section 14.2: Expenditure for purchase (including repair & maintenance) of transport equipment for domestic use during the last 365 days**

Question no.	Question description and code structure								
Q14.2	What is the quantity and value of the <i>transport equipment</i> procured by the household for personal use during last 365 days?								

item	item code	first-hand purchase			cost of repair & maintenance (Rs.)	second-hand purchase		total expenditure (Rs.) (5)+(6)+(8)
		no. of item purchased	whether purchased on hire yes-1, no-2	value (Rs.)		no. of item purchased	value (Rs.)	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
motor cycle, scooter	601							
motor car, jeep	602							
bicycle	600							
tyres & tubes	603							
other transport equipment	604							
<b>personal transport equipment: sub-total</b>	<b>609</b>							

**Section 14.3: Expenditure for purchase (including repair & maintenance) of sports goods for domestic use during the last 365 days**

Question no.	Question description and code structure								
Q14.3	What is the quantity and value of the <i>sports goods</i> procured by the household for personal use during last 365 days?
